Random Scenes in the Community Development Day Care Center of Brooklyn, Inc.

By Ted Malino

"Your children . . . are the sons and daughters of life's longing for itself. You may give them your love but not your thoughts For they have their own thoughts. You may house their bodies but not their souls For their souls dwell in the house of tomorrow, Which you cannot visit, not even in your dreams, You may strive to be like them, but Seek not to make them like you. For life goes not backward nor tarries with yesterday . . .

Law and order is the suppression of any and all attempts to create any realistic vement to eliminate hunger and poverty; genecide and war; ghetto's and unemployment; hate and racism. The "law and order" precedent set by the colonist's, and symbolically expressed by the founding fathers, remains today. It was no accident that the Aristocracy, the wealthy colonist's rebelled against British law and order. It was no accident that poor people, the oppressed, were allowed to migrate to the new world. It is no accident today that the oppressed, the working class, is rebelling against American law and order. Just as it is no accident that Black capitalism today's "oil on froubled water." LOCAL SCHOOL BOARD ELECTIONS (Warch 19, 1970)

March, 1970

There are elections pending which can affect the education of every child in the public schools.

The Local School Boards will have a significant control over the finances expended on education and a determining voice in where the money will be spent. In short, the determining of priorities will largely be a function of the Local School Boards.

We need Black Representation on every Board that spends money on Staten Island. We cannot rely on the right wing mentality of John Marchi's homebase to have a sense of justice which includes Black and Puerto Rican people.

Ernest Dow

Mr. Ernest Dow has been active on Staten Island in a variety of ways related to education, economic and social needs of the community as a whole, but specifically with the Island's Black and Spanish segments and with

Mr. Dow states, "I believe than an educational system should be relevant, innovative and reflect the importance of the widest spectrum of the community. This can only be accomplished if a board reflects a valid cross-section of the community's desires and goals through dedicated representatives. I am running as a candidate, hopefully, to bring the board the needs, complaints and recommendations from the Black and minority people, but at the same time to be mindful of the total needs of all Staten Island chidren in the area of education."

Mr. Dow is presenty employed as Educational Director, Regional Manpower Opportunity Center #XI, 45 Wall Street, Staten Island, N.Y. His work deals with basic adult education, geared towards vocational education, general education development diploma and the college bound program.

Luther Routte

Mr. Luther Routte's active involvement with youths dates back 10 years, when he was a street club worker for the New York City Youth Board. This enabled him to have direct contact with children of all calibers. By utilizing buddy-buddy type encounters, he was able to communicate with some extremely disturbed youngsters and view their opposition to schools, parents and society. He also consulted with parents on various community problems, thereby becoming knowledgeable of community needs in education and social turmoils from the grass root

As a candidate, Mr. Routte feels that his experiences will prove to be an asset, enabling him to relate the educational needs of the community to the local school board.

Mr. Routte is presently serving as the director of the West Brighton Senior Citizens Center, which is located at 230 Broadway, Staten Island. He was president of the West Brighton Community Council, which sponsored the first anti-poverty program on Staten Island.

Edna Prince

Mrs. Edna Prince has been actively and diligently fighting for the needs of Staten Island for many years. Her involvement extends into almost every problem area, highlighting on education, housing, mental health, social ser-

Mrs. Prince is the organizer and presently vice president of the New Brighton Civic Association. Some of the accomplishments of this association are street light and sewage repairs, plus numerous improvements in poor housing conditions.

Mrs. Prince also serves on the advisory boards of many resourceful agencies such as the Mental Health Head-Start Program, New York Legal Aid Society, New Brighton Civic Association and the Board of Education's title I program. She holds membership in the Civic Congress of Staten Island and the Mayor's Task Force.

Mrs. Prince states, "I would like to be the voice of the community's needs, but also cooperate and recognize the needs of children in all communities as far as education is concerned. The future of our community and our children depends on the decisions we make today."

"All of my endeavors have been undertaken as a result of some existing condition affecting our children either directly or indirectly."

(Continued from Page 2) and Victnamese have been wounded and killed because of this pol-

logically advanced civilization ever to exist, the people are kept ignorant to world and local events. The news is distorted and redistorted prior to being passed to the public via the media. Common gossip and rumors are often far more reliable than the misrepresentations that we read and hear via the media. The information is there for those who seek it, but the odds are with the establishment, because people are all to willing to accept what they are told as the truth. So is the case against the B.P.P. received by Americans, if it is in the media, it must be sospel. The American public has re-

fused to become curious as to why Black's are being gunned down, arrested, and harrassed. The same Americans that condemn Huey P. Newton, Bobby Scale, Eldridge Cleaver, David Hilliard, and hundreds of other Panthers; the very same Americans say that a public official, such as Alioto, Adonjzio, (Adonizio, the mayor of Newark, is under Federal indictment, along with several individuals from his administration, for tax evasion and matia connections. Alloto, San Franciscos Mayor, is under investigation for fee splitting, and is involved in suing a well known publication that publically accused Alloto of having mafia ties, are innocent until proven guilty Justice? or the planned elimination of the Fanther Party? The democratic government as practiced in this country seems to play favorites. The Panther Party realizes that Newark is not the only city controlled by the masia, and the party realizes that any fight against poverty and was slavery is a fight against the mafia. The man on the street has the same realizations, it then stands to reason that the "very surprised" investigators were and are aware of exactly what is happening.

Several magazines (All American, thereafter reliable, in their strangely enough, is worked into readers opinions) have exposed the price to cover for the rising the extent of mafja control in industry, the military and most means that the government is of city, state, and federal agenbling, prostitution, dope; and the movie industry, the recording industry, the construction industry, and food and marketing industries are utilized as fronts for mofia operations.

It makes one wonder why the American public has not demanded an intensification of investigations involving suspected maffa figures and maria front organizations. It makes one wonder: why the American public has not demanded an immediate, all out. investigation, an all out war on crime in America. Why have Americans not demanded that dope traffic be stopped, instead of demanding that dope users, and small fry dope pushers reneive stiffer fail sentences? Why did Nixon refuse to monetarilly arm his army to Sebt his war against orime? A request for approximately \$60 million was met with a drop in the bucket—\$2

he has shown a reluctance to financially enable the job to be done properly. There is something wrong there that needs an immediate investigation.

Information without factual documentation is food for curiosity. The established political structure of America is starying all of us. The established political struc-

ture of America is not serving the needs of the people. It is not even meeting the minimum standards, set by itself, to guarantee an end to hunger and malautrition. The educational arenas are mismanaged, and the politicians are corrupt. (The local sheerifs, at least on Jersey Street, can be seen collecting their graft atmost any day of the week).

America-love it or leave [t? Why not find out why and how to make it "loveable" for everyone? leaving it won't change it. You see, love of country is not lacking among the dissenters; love of country, love of justice, and love of humanity is exactly what dissent is all about. The bigot's and the racists that cheat the poor, exploit the workers. and who make deliberate mistakes on their income tax(in their own favor over that of the government that they love so well) are the people that should leave. Their concept of "America-love it or leave it" is what they can get for themselves at the expense of others. They are the people who scream like raped ages when welfare recipients are given a raise in the budget, and say very calmly, when the U.S. Navy over-pays 96 million dollars for a 151 million dollar destroyer, "We goofed." The average American doe's

ment pays 60% of every dollar spent by private industry for research, and that the other 40% is tacked on to the final contract should the government deelde to purchase from the company in question, this 40%, cost of material and labor. Staten Island

By Jamette Spencer and Ramona Deffendorf

To those who think you have to be a member of the Black Panther Party or any other "Black Activist" or "Revolutionary" group to be the target of racist attacks:

Miss Doreen Dow the daughter of Mr. Ernest A. Dow. was the victim of a physical beating while attending Curtis High School here on Staten Island on February

As Miss Dow related, she was climbing the stairs to the fourth floor of Curtis High School when she was conscious of a voice from her rear. "Did you write an article in the "Cats?" (referring to an article that Miss Dow had written in her school newspaper). "Yes." "Are you Doreen Dow?" "Yes." Immediately following her affirmative response to this query Miss Dow was struck in the abdomen. Miss Dow then fell to the floor. Her assailant, a dark complected caucasian dressed in a black imitation leather jacket and dark pants, then fled the scene.

Miss Dow continued on her way to class, where she reported the incident to her instructor and asked to be excused to see the dean. Denving her request the instructor told her to be seated and begin taking an examination along with the rest of her clas. After threatening to leave without permission, Miss Dow was finally allowed to go to the Dean's

The Dean's immediate reaction to her story was to attempt to locate her assailant and to notify Mr. and Mrs. Dow of the inci-

Upon returning to the Principal's office, after an unsuccessful "search", for the assailant, the Dean and Miss Dow found that. Doreen's mother had arrived and was awaiting them in the Principal's office. Mrs Dow insisted that she accompany her daughter on an independent search of the school—his request was initially denied, but after rigorous demands on the part of Mrs. Dow. the school authorities consented to her request.

At 12:50 Mr. Dow arrived at the school and informed the Principal for the first time of the incident. Up to this time, the Principal was completely unaware of what had taken place. Mr. Dow's personal appraisal of the case was that there as an "indifference" on the part of the administration, and an ignorance as to the possible consequences of an attack upon a Black girl by a white student after that girl has written an article in support of what is known as "Black Militancy". The total sum of administrative actions at Curtis High School to locate Doreen's assailant and to insure that incidents such as this do not recur were two conferences. One of these conferences was attended by concerned students of Staten Island Community College and certain community members. This conference was not scheduled by the administration. The entire incident was known to the Staten Island Advance but was not published in their subsequent issues and hasn't been to this writer's knowledge mentioned in any way.

The 60's and Black America

The sixties, in America, was the scene of many changes for the Black man. It was the age of the "Long Hot Summer" or better known as the time when the Black Community took their dividends from the people who had been robbing them for years in their communities throughout the ed more recognition from White nation. This burst of Black energy and Black America, but it acinto a strong external force of tually offers little or no advanviolence brought foth a counter- tage to them or anyone else. A action throughout the nation. New few token Blacks were placed in Federal, State and City Programs some new position and seen sprang up in most of the major more often, but the power remaincities, to remove Black youth ed as stable and exclusive as from the streets; drawing them into the system and dulling the pangs of frustration and powerlessness that had driven them into the streets in the first place. These programs were accompanied by an increase in the Police Arsenal, Special Tactical Forces, Anti-riot training and Pig pressure served as America's answer to the race riot.

A big challenge came along.

following this period, that must

have done wonders for lock-

smiths and gun manufacturers. Black Power became a part of the nation's vocabulary. The mere combination of Black with the word Power brought fear to the racist, guilt-ridden soul of America. What would power mean to a people who had been oppressed for so long? What would this mean to a people who had killed, and raped and humiliated these people for so long? White America turned to the long established Civil Rights organizations and leaders to define the term Black Power. These leaders perceived Black Power as "Green Power," "Vote Power," "Brain Power," but were very careful to stay away from "Gun Power." White America breathed a deep sigh of relief. Black Power was defined as economical and political in thrust and therefore under the control of the established economic and political powers in the nation. Political power was kicked around and debated, while economic power became Black Capitalism-adding black to the world capitalism makes about as much difference as adding water to water, all you get. America began to welcome and encourage Black Capitalism and why not? What easier way to eliminate the problems than to make the Black man identify with and ascribe to the very system that has suppressed him so long. How can you speak of Brothers and Sisters and believe in an economic system which is dependent on the success of the individual by defeating and depriving others to achieve your goals. There is no unity, no common goals for the benefit of the whole, only the goal of the individuals. succeeding through deft competition and the defeat of others. Of course American capitalism as very moralistic and beneficial goals, economic growth, full em-

The American cry of Black Ca-

pitalism came too late to halt the Black movement that had begun however. It may have served to soothe the people for the present, like many Federal Aid Programs do, but the true struggle for "human dignity" goes further than the osmosis of the American way of life. It is no longer only a matter of becoming an American, of wanting to belong, to fit in: not just a battle for Black rights but a struggle against an oppressive system which is strangling the white American in the Appalachian mountains just as certainly as it is destroying the American Indian children on barren reservations and black tenant farmers in Mississippi, and Vietnamese and Loatian peasants in Asia.

As people become more aware of the hideous trick that has been played upon their minds and souls by a rather small group of individuals in power and as people begin to flex their muscles and attempt to deal with their condiions of life the struggle will become more bitter and will encompass many more people. If we are ever to stem the tide of inhumanity in our nation and the world the struggle must go on. The struggle will go on.

At the present time, the nation is witnessing a struggle on all levels between the forces of the neonle and the forces of governmental repression. At stake is the right of all people to live like human beings in a society peace with the rest of the

We have all seen the price of dissent. Black Panthers, Young Lords Organization members, Young Patriots, in short every organization that is truly attempting to reach the masses of people to awaken a sense of common interest and concern have been harassed, bullied and finally

The actions of the government are to be expected. No group or individual ever has resigned power without a struggle. Therefore the people must be careful to constantly be on the alert for instances which split unity and detract from the purposes and goals of our vanguard organiza-

Recently, a female worker for the Black Panther Party was accosted by an individual presently attending Staten Island Community College. This individual has been identified. This individual attempted to take monies from the female worker for the Black Panther Party. The worker ran and was chased by this individual and two companions who have not yet been identified. Fortunately, this worker for the Black Panther Party was not physically harmed and she was able to protect the monies that she had for the Black Panther Party Defense Fund for the New York 21.

In a time when governmental pressure is heavy, it is intolerable that anyone who is part of the people for whom the vanguard organizations have laid down their lives should act in such a reactionary fashion.

This individual has also been tentatively identified as a dealer in hard drugs (heroin, etc.). This action is also deplored not only because of the destruction of brothers and sisters that these drugs portend but because these activities while going on here at Staten Island Community College are bringing this institution more and more to the eyes of that very same government which is bent on destroying all forms of real dissent in this nation.

Personal gain cannot be placed before the welfare of the people at large.

This is not a simple matter. In the Administrative Branch there are a greater number of Black people than has ever been at Staten Island at one time since its inception. To a great many Black students these individuals represent hope for a future life which the student will have an opportunity to use the skills developed in the college tot he benefit of themselves and hopefully their communities. For many even this "image" of hope was not afforded the Black high school or college student. Every Black student in the past spent many agonizing hourse of frustration and worry as to whether or not the skills developed in College will ever be used; as opposed to the general student concern of how well these skills will

For this reason, there is a natural inclination on the part of Black students to think of the Administration with a favorable

Fit For Niggers

The housing situation in Brownsville is the worst in the city of New York. The area looks like the aftermath of World War II. The avaricious landlords can never be found. They don't show up to collect their rentals for fear of being supoenaed. They persist in refusing the minimal services for tenants who are forced to in these conditions because of the current housing shortage in New York City, because of poverty and because of racial discrimination in the real estate in-

When the people on welfare refuse to pay their rental because of the conditions, these housing pimps make deals with the welfare so that the checks will be sent directly to them. The corcupt housing officials and welfare officials are quickly swayed to report that there are no violations on the landlord's buildings. usually through the use of bribes. The people are lied to constantly by the demagogic politicians in City Hall and Albany. The people have been told that if they put pressure on the landlords and the city, the city will reduce the rentals and take over the building. This is fust one of the contradictions that lies within the power structure because what the politicians are doing is trying to rin off the land as cheaply as they can get it. After obtaining the land middle income housing will go up in place of the tenemants and the poor become nomads again at the mercy of landlords and bureaucracies to again be placed in the same conditions they had just left.

The people are slowly becoming hip and the people are tired of this method of soul murder by which their children's and their lives are being destroyed. In the upper east side, the Young Lords Organization is struggling to uplift the health of the people in their community by going house to house with equipment to check for the possibility of lead poisoning in children. Tenants groups have formed throughout the city to fight proposals by the landlords for increased rentals without any guarantee that services will improve or even be instituted. The people are tired of the bull shit and it's about time.
