full pages in two suches to articles on what he sensationally such former assistant super it St. Lawrence Ogitate head whook School for redeen on Staten Island, which will be super in the control of th 

Dr. H. H. Berman

ias a commander in utring the last world er returning to civil his position here to brook, where he was a Milton Jacobs, forof the medical staft, of the employees at

Here, too, research turns, the study of animals. For example, study of animals. For example, study of animals. For example, and the articles, methods of performing heart surnds here, are given impossible were perfected after mineral manufacture. It will reach the control of the following the mineral manufacture is mental deficiency in children.

4.000 children at The animals may yet furnish manufacture is mental deficiency in children.

5.000 retarded method by manufacture is mental deficiency in children.

6.000 retarded Berman makes clear: a mental process of the causes and the point that property are people who were once sane. The school is supported by that these children of causes and they cannot yet employ at Willowbrook. The school is supported by point that property is state funds and Dr. Berman has the school is supported by state funds and Dr. Berman bentous that it now costs state funds and Dr. Berman will be developed more taking advantant the money problem of the property of the children will be not only the property of the children will be developed more bry to teach read the world.

The school is supported by the money problem of t
