

*She comes here;
I just missed her*

I would like to apologize to Dr. Ella A. Curry, Director of Staten Island Developmental Center, for the statement I made recently to the Staten Island Advance.... I told Dr. Curry it was a pleasure meeting her for the first time when she toured the press our grounds and to Building 10, where I am assigned on the day shift.

Due to a lengthy illness which kept me home from August 1981 to March 1982, I did not have the pleasure of seeing our director: When Dr. Curry visited our building, either I was on pass days or doing errands for our building. My statement would give the impression Dr. Curry does not see her employees or visit the buildings, which indeed she does, not only on the day shift, but also on the evening and night shifts....
