

## ***Stop construction, save the Greenbelt***

The following was sent to Gov. Mario Cuomo:

"Staten Islanders respect and admire you for keeping your promise to stop the state Power Authority on Staten Island. Help save the Greenbelt now by not building group homes in the Corson's Brook Woods. We want to see modern housing for the developmentally disabled built promptly in an appropriate place. With 382 acres at the Staten Island Developmental Center, it is not possible that the only satisfactory site is in the Corson's Brook Woods."
