CSI Retrospective

Winter 196

In what proved to be the worst winters in New York's history, CSI was crippled by tremendous amounts of snowfall and freezing winds. Snow drifts piled onto buildings as high as twenty feet, which rendered many entrances and exits useless.

The record breaking winter also effected campus plumbing. Several buildings were flooded out when water pipes collapsed under the extreme temperature.

Winter '96 marks the third fierce winter since the college moved to the new Willowbrook campus.

IDNES

World Series

The Cleveland Indians and the Atlanta Braves squared off in the first World Series in two years. This was, perhaps, the first between teams with politically incorrect nicknames.

The hard-hitting Indians compiled a lofty team batting average of .291 for the season, while the Braves pitching staff, led by Greg Maddux (19-2), was widely acknowledged to be the game's best.

It was a Series of the bats vs. arms. And in the end, the arms were held aloft in triumph.

The Braves won the Series in six games, after taking a two-games-to-none lead in their home park. They won the Series on their return to Atlanta with a 1-0 victory marked by David Justice's home run and the one-hit pitching of Tom Glavine, who was named Series MVP.

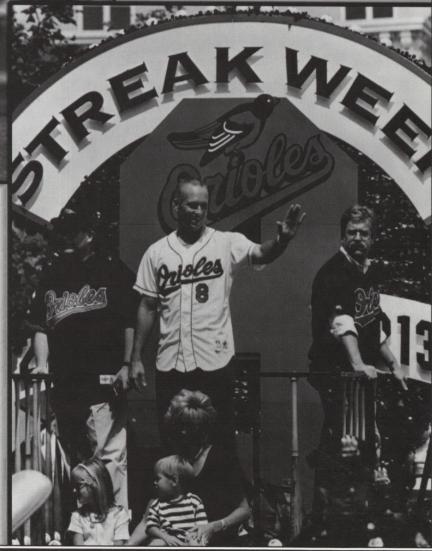

Cal Ripken's Streak

For months, baseball fans were talking about The Streak. With each game he played, Baltimore Orioles shortstop Cal Ripken Jr. drew one more game closer to breaking one of baseball's "unbreakable" records.

In 1939, Yankee first-baseman Lou Gehrig retired after having appeared in 2,130 consecutive games, an accomplishment that surely would never be equalled.

In 1995, Ripken not only equalled it -- he surpassed it! On September 6, 1995, Ripken took the field, as he had done in every Orioles game since May 30, 1982, to play against the California Angels. This was consecutive game 2,131.

Befitting a hero, Ripken hit a home run in the game won by the Orioles 4-2.

Conflict in Bosnia

Despite continued NATO air strikes and UN peace efforts, the conflict in the former Yugoslavia raged on, 1995 began with a four month ceasefire mediated by former United States President Jimmy Carter, but the truce didn't put an end to the fighting.

The former Yugoslavia has been the scene of a civil war since June 1991, and the fighting intensified in 1992 after the Republic of Bosnia-Herzegovina declared its independence.

Bosnian Serbs, seeking independence from Bosnia, began their siege of the capital, Sarajevo, as the European community and the United States formally recognized Bosnia. More than 200,000 people have been killed or are missing.

In May 1995, NATO planes attacked Serb ammunition depots. The Serbs responded by attacking "safe areas," killing many and taking hundreds on UN peacekeeper hostages.

In June, Serbs downed a US F-16 over Northern Bosnia. The pilot, Air Force Captain Scott O' Grady, hid for six days until he was rescued by US Marines.

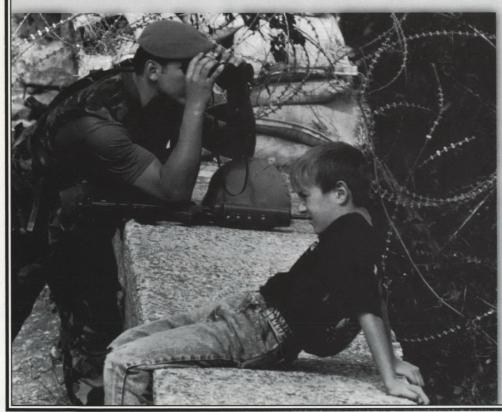

US Troops Arrive in Bosnia

The first US Apache and Blackhawk helicopters roared into Bosnia on December 24 (1995), tangible sign of a NATO mission commanders said was on target and taking control of front-line positions.

While the eight American helicopters, part of the 1st Armored Division, were arriving in the northern city of Tuzla, the headquarters for US troops, French soldiers were extending control in Sarajevo, where a curfew was lifted for Christmas Eve and Christmas.

French troops seized front-line checkpoints north of the city, and took over part of a large resort in Serb-held Ilidza west of Sarajevo that is to become part of NATO headquarters. They also reached agreement with Serbs and the Muslim-led government on an initial pullback from front-line positions around the Bosnian capital.

In Sarajevo itself, the city's people strolled peaceful streets into the early morning. Hope came with Christmas.

Million Man March

The gathering in Washington, D.C. on October 16, 1995, was tremendous. Hundreds of thousands of African-American men converged on the nation's capital in response to the call from Louis Farrakhan, the Nation of Islam's leader, to rally for unity and brotherhood.

It was the fourth-largest demonstration in Washinton's history, and the largest predominately African-American gathering.

There were dozens of speakers, including civil rights veterans Rosa Parks, Dick Gregory and Reverend Jesse Jackson. Stevie Wonder sang, and Maya Angelou read a poem that urged the men to do right by themselves and "save your race."

The rally's climax was
Farrakhan's speech in which he led
the men in a pledge to "never raise
my hand with a knife or gun to
beat, cut or shoot... any human
being." He urged the rally to join
organizations, gain political control,
fight racism and rid their neighborhoods of crime, drugs and violence.

Nuclear Protest

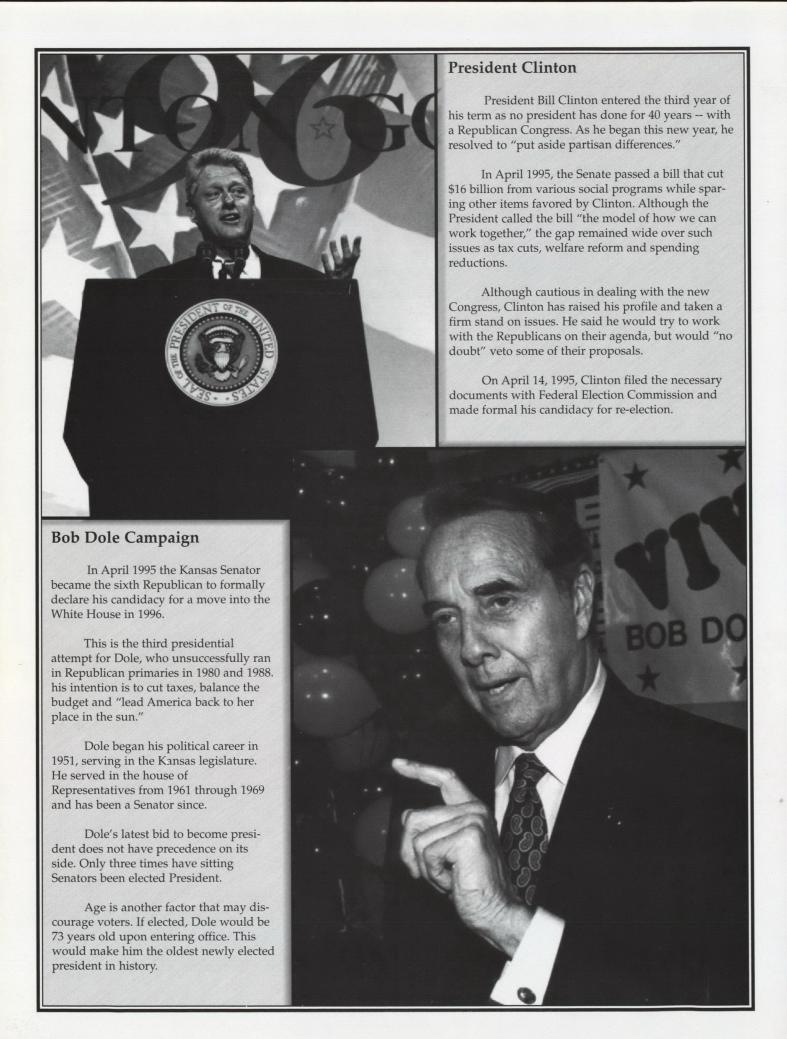

On September 5, 1995, France resumed underground nuclear testing when it detonated a device under a remote atoll in the South Pacific.

Worldwide protests preceded the nuclear test, and criticism from the world followed it.

Anti-Nuclear demonstrations were staged in various parts of the world, including Paris, Tokyo, Switzerland, Australia, and Hiroshima. Two days of rioting, looting and firebombing exploded in Papeete, Tahiti, which lies about 750 miles from the test site. Two ships, part of a Greenpeace "peace flotilla," were stormed and captured by French commandos nearby.

France's President Jacques Chirac defended the tests, saying they would provide information allowing France to conduct computer-simulated tests in the future. Chirac also said that more tests were planned, but that France would sign a global test-ban treaty at their conclusion.

Mideast Peace Accord +

"The sight you see before you... was impossible, was unthinkable, just three years ago," Israel's Prime Minister Yitzhak Rabin told those present at the East Room of the White House.

The "sight" was the September 28, 1995, signing of an accord between Israel and the PLO that would end Israel's military occupation of West Bank cities and lay the foundation for a Palestinian State.

President Clintion presided over the ceremony which featured two hours of speeches and pageantry before an audience of diplomats, foreign ministers, Cabinet secretaries and members of Congress.

The agreement outlines the process for the gradual withdrawal of Israeli troops and transfer of governing authority for Palestinian self-rule in 30 percent of the west Bank. It also allows for Palestinian elections and the release of 5,000 Palestinian prisoners being held by Israel.

[†] Prime Minister Yitzhak Rabin was assassinated by a Jewish extremist in Israel on Saturday, November 4, 1995.

The Release of Harry Wu

On August 24, 1995, human rights activist Harry Wu set foot on American soil after being imprisoned in China for 66 days.

A native of China and a naturalized US citizen, had been taken into custody on June 19 while trying to enter China at a remote border crossing.

He was convicted on charges of stealing state secrets and was sentenced to 15 years in prison. Within hours, however, he was released and deported, in an apparent attempt to improve delicate relations between the United States and China.

Wu's trip to China had been one of several clandestine treks he had made since 1991 for the purpose of researching and filming evidence of abuses in China's prison labor camps. His efforts had resulted in television documentaries that gained international attention.

It was a hero's welcome that greeted Wu as he stepped off the plane at San Francisco International Airport. Crowded around his wife, Ching-Lee, were dozens of supporters carrying "Welcome Home" signs, yellow ribbons and roses.

A few days after his return, Wu and his wife went to the City Hall of his hometown Milpitas, California; to cut down the yellow ribbon that had been hanging throughout his imprisonment.

Hurricane Opal

On the evening of October 4, 1995, Hurricane Opal came ashore on Florida's Gulf Coast, packing sustained winds of 125 miles per hour. Before it was through, the storm had killed at least 20 people in four states and caused at least \$1.8 billion in damages to insured properties, making it the third-costliest storm in US history.

Hurricane Opal swung east toward Florida after striking Mexico's Yucatan Peninsula.

The storm destroyed or damaged thousands of homes and businesses along a 120-mile stretch of the Florida Panhandle. Many of its residents were still recovering from the damage inflicted by Hurricane Erin two months earlier.

Opal caused the sea to rise 15 feet and sweep away nearly everything on the lower floors of homes and businesses along the edge of the Gulf Coast. Power outages were widespread, and there were many incidents of looting.

Some of the hurricane's victims were allowed to return home a week after fleeing, even though water, electricity and sewer services had not been restored. Others, from more severely damaged areas, had to wait longer.

Amtrak Crash

The news was terrible: an Amtrak train derailed while crossing a trestle in a remote desert region of Arizona, 55 miles southwest of Phoenix. What made the news even worse was the suspicion of sabotage.

Occurring around 1AM on October 9, 1995, the derailment of Amtrak's Sunset Limited, en route from Miami to Los Angeles, sent four of its cars into the gulch 30 feet below the trestle. One person was killed and more than 70 were injured.

The derailment was caused by the removal of a metal bar that held two sections of rail together. The culprit installed a wire, disabling a light that would have warned the train's crew about the break. The saboteur's apparent knowledge about the warning system led to speculation that it might be the work of a railroad employee.

Found at the scene was a letter that made reference to the federal sieges at Waco, Texas, and Ruby Ridge, Idaho, and also mentioned the FBI and the Bureau of Alcohol, Tobacco and Firearms. It was signed "Sons of Gestapo." The letter raised fears that the derailment was the work of anti-government terrorists.

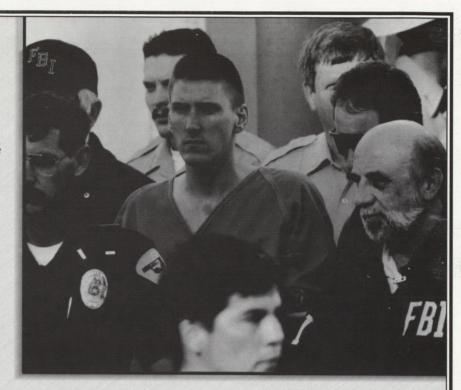

Oklahoma City Bombing

On April 19, 1995, a car bomb exploded in Oklahoma City (OK), destroying the Alfred P. Murrah Federal building and killing scores of men, women, and young children.

The force of the blast tore off the building's facade and sent it flying 50 feet across the street, where it slammed into another building and came to rest in a parking lot. With the outer wall of the building suddenly gone, workers tumbled out of their offices and into the street where the blast had created a crater 30 feet wide.

Shortly after the explosion, Timothy McVeigh, a Gulf War veteran was arrested for carrying a concealed weapon. Two days later, he was recognized as one of the bombing suspects and was charged.

Gaseous Pillars in M16 · Eagle Nebula Hubble Space Telescope · WFPC2

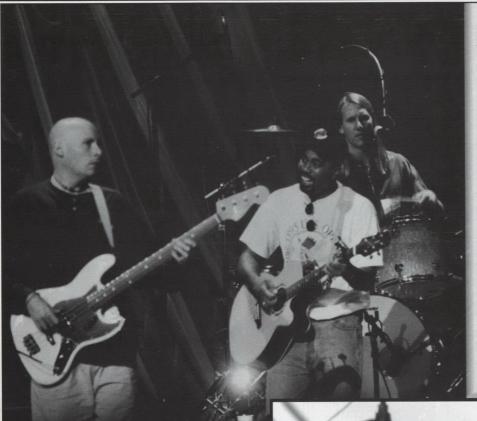

Portrait of a Star

The first detailed image of a distant star shows that the red giant Betelgeuse has a single, gargantuan hot spot that may be 12,000 degrees and an atmosphere extending much farther into space than once thought.

A Hubble Space Telescope image of Betelgeuse gives, for the first time, details of a star other than the Sun and suggests that it may have dramatic physical differences from the Sun.

"We have looked into space and have seen the face of a star," said Andrea Dupree of Harvard-Smithsonian Center for Astrophysics in Cambridge, Massachusetts. "It is exciting."

Betelgeuse, 500 light years from the Earth, is the shoulder star in the constellation Orion, the hunter. It is the seventh brightest star in the winter sky of the northern hemisphere and appears to have a reddish tint to the naked eye.

MTV Awards

Last Summer it seemed as though Hootie and the Blowfish were playing every time you turned on the radio.

The four-man rock group that seemed to come out of nowhere and dominate the audio scene did not go unnoticed on the video scene. Hootie, featuring vocals by lead singer Darius Rucker, won an MTV award for best new artist for their video, "Hold My Hand." The presentation was made at the 12th annual MTV Video Music Awards held in September 1995 at Radio City Music Hall in New York.

Dennis Miller hosted the ceremony, which included awards to Tom Petty for best male video, "You Don't Know How It Feels," and Madonna for best female video, "Take a Bow."

Jerry Garcia

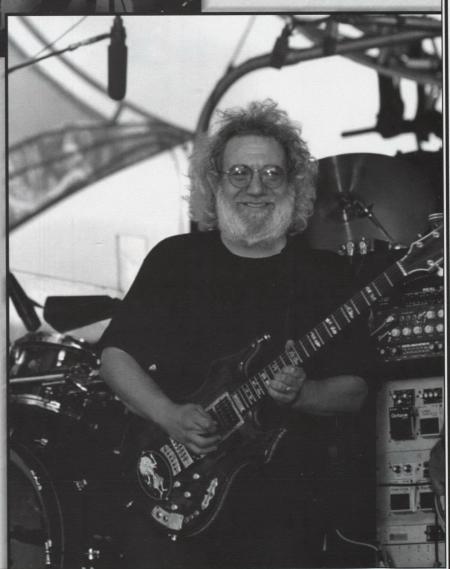

The leader of the Grateful Dead is gone. Jerry Garcia, co-founder of rock music's the Grateful Dead, died of a heart attack while in a drug rehabilitation center in suburban San Francisco.

The guitarist, composer and singer passed away on August 9, 1995, just eight days after his 53rd birthday.

Deadheads, as the group's followers were known, quickly gathered to note the passing of their fallen leader. Crowds formed in public areas in San Francisco, Garcia's hometown, and in other cities to share their loss. A single red rose was tied to a tree in front of the San Francisco address where the Dead began in 1964.

The Grateful Dead blended rock, bluegrass and folk flavors into their own sound. Although studio recordings by the group were rare — the most recent was released in 1989 — the Grateful Dead remained a very popular concert attraction.

Jerry Garcia had the rare distinction of having an ice cream flavor named for him – Ben & Jerry's "Cherry Garcia." The company's founders said that Garcia had inspired their business philosophy.

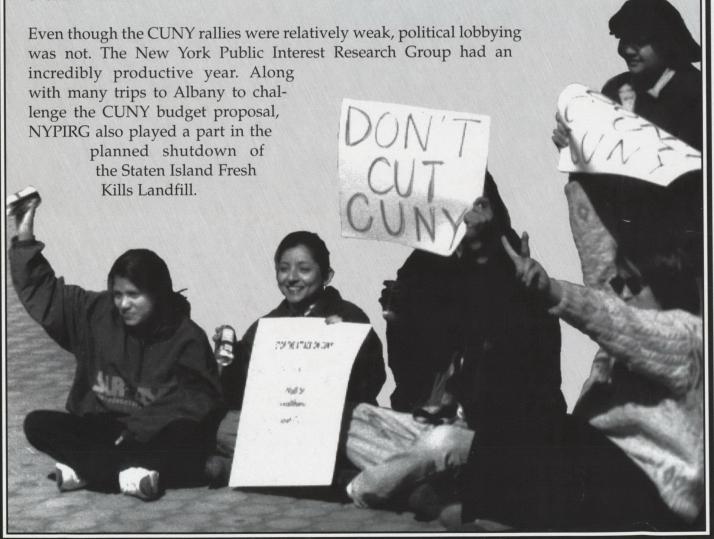

CUNY CUTS CONCLUDE

Yet another year of drastic cuts and tuition increases faced CUNY this past year. However, this time there was a different outcome. The proposed \$250 increase in tuition and additional reduction in services was not accepted into New York's budget.

While this year there were protests against the CUNY cuts, these demonstrations did not have the same ferocity of 1995. As in the previous year, The College of Staten Island could only gather a hundred students at any particular event.

Graduation Ceremony

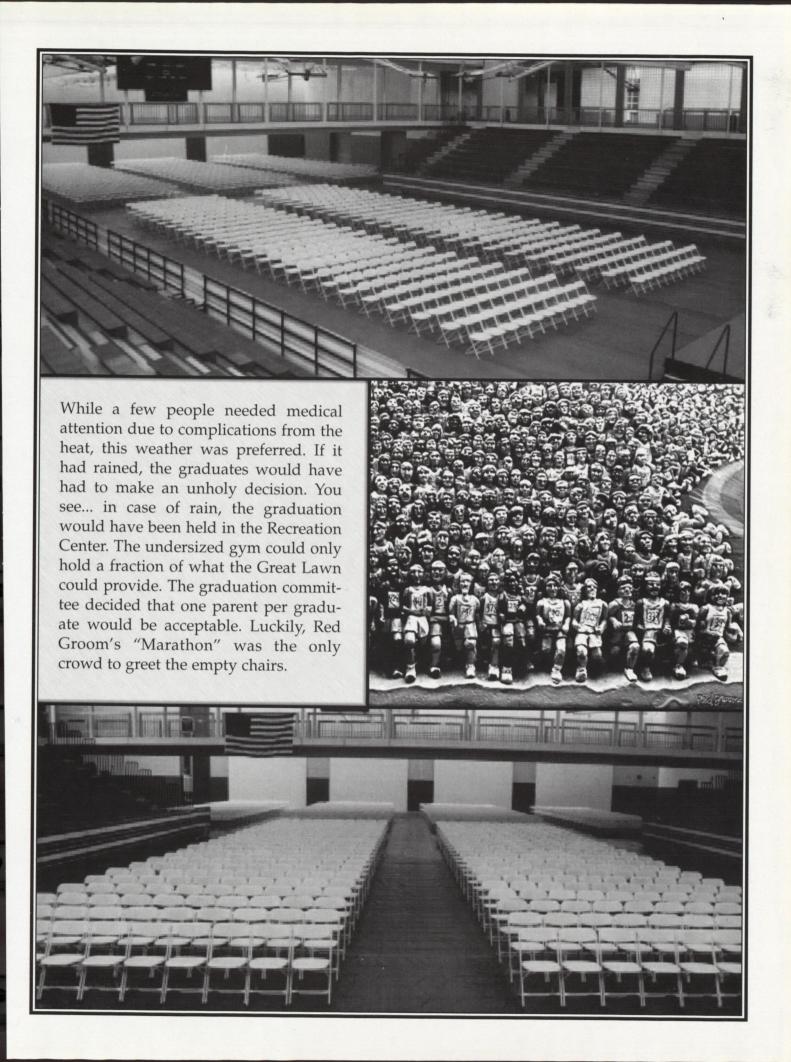

It was a hazy, hot and humid day for commencement. Umbrellas were stretched open to provide protection from the sun rather than the rain. This proved to be one of the hottest days in the somewhat cool and cloudy Summer of '96. Not only was the weather unusual, but the date of the graduation ceremony was peculiar as well. This was the first "Thursday" graduation.

SCREAMN' AT YOU WITH 10 WATTS OF SLAMMN' POWER

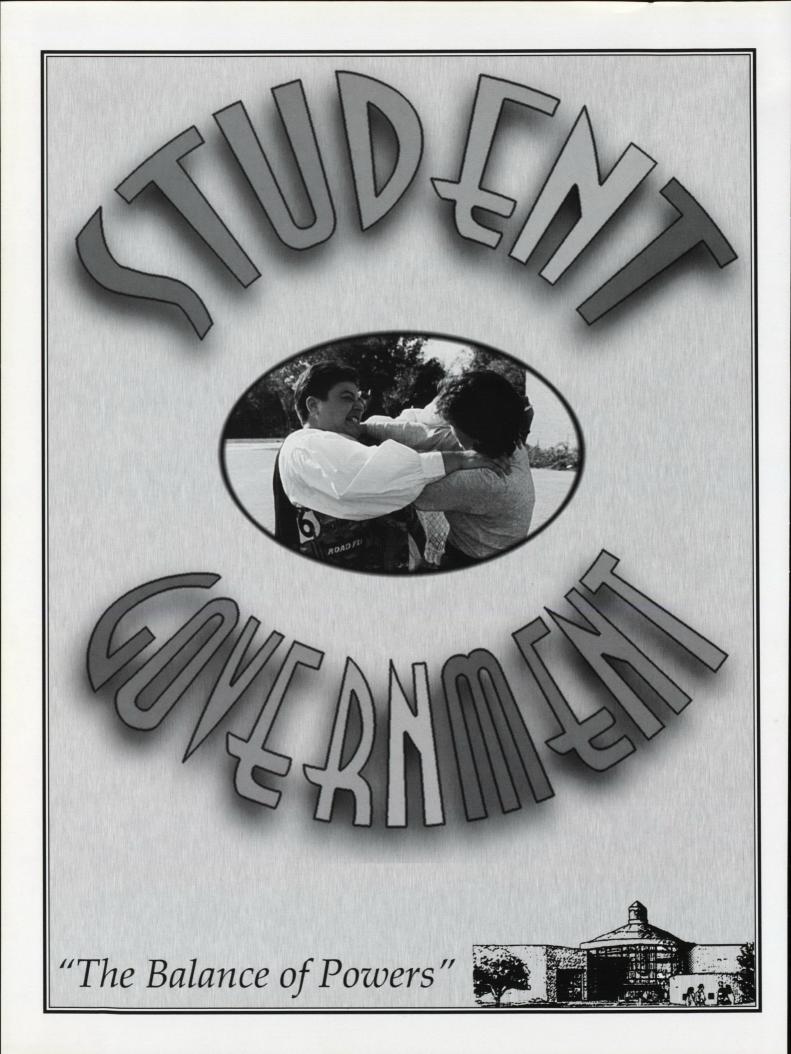

WSIA is involved with the community. The station has been involved with the Juvenile Diabetes Walk, Fleet Week, MADD, Gateway Summer Concerts, Staten Island Historical Society, the College of Staten Island International Festival, the Project Hospitality Food Drive, and the benefit for the Burn Center.

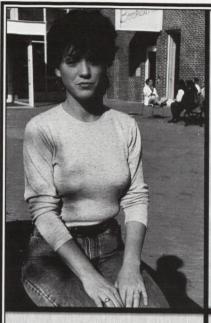

STATEN ISLAND'S ONLY-RADIO STATION RADIO STATION

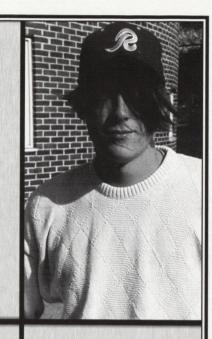

DID YOU KNOW WSIA ...

- Is the most powerful 10 watt radio station on the east coast. WSIA's antenna is located atop Todt hill, the highest natural point on the entire east coast.
- · has the potential to reach 2,500,000 people.
- has new state-of-the-art facilities. This includes digital production studios.
- · Broadcasts 20 hours per day with music, news, sports and information.

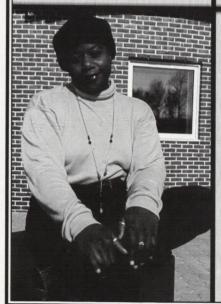

Student Government:

Staff:

Nancy Somma

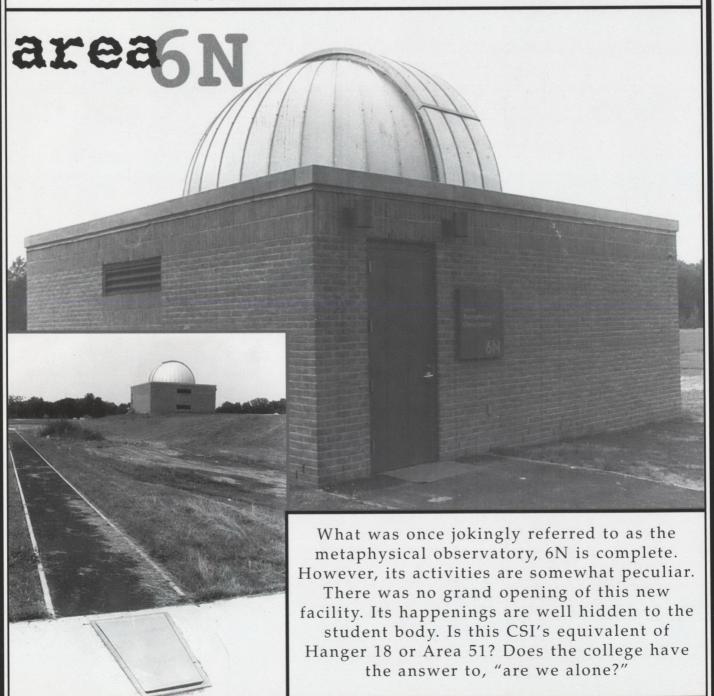

Ellen Krieger

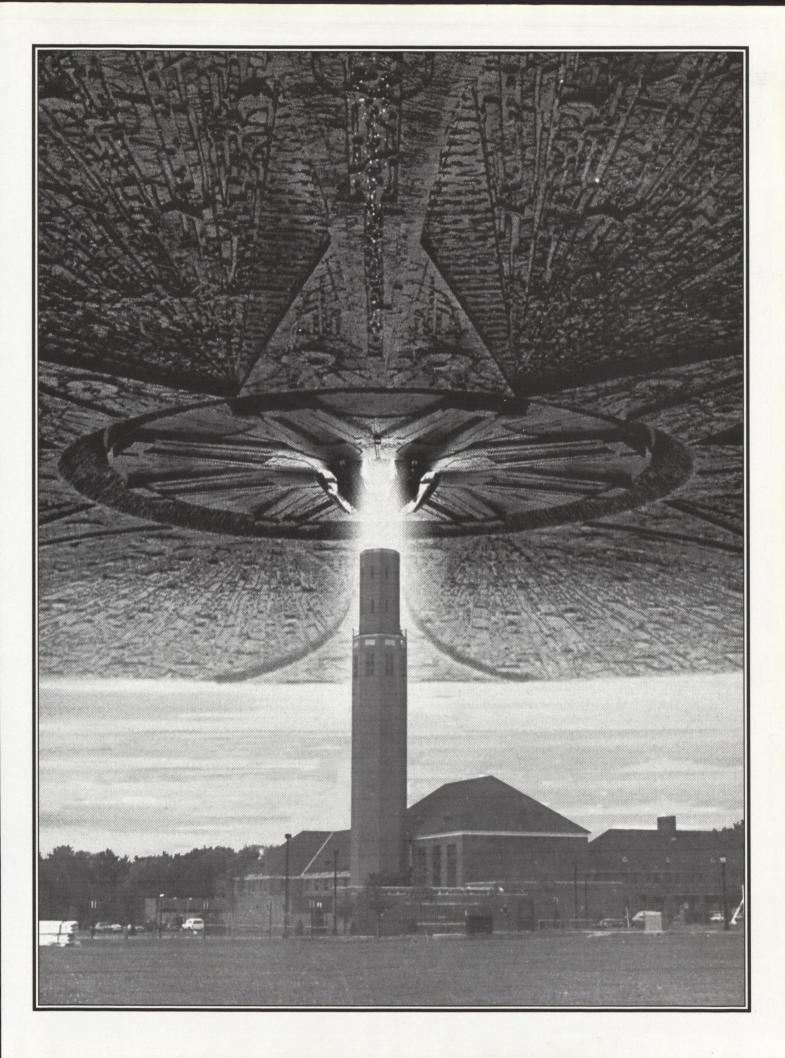

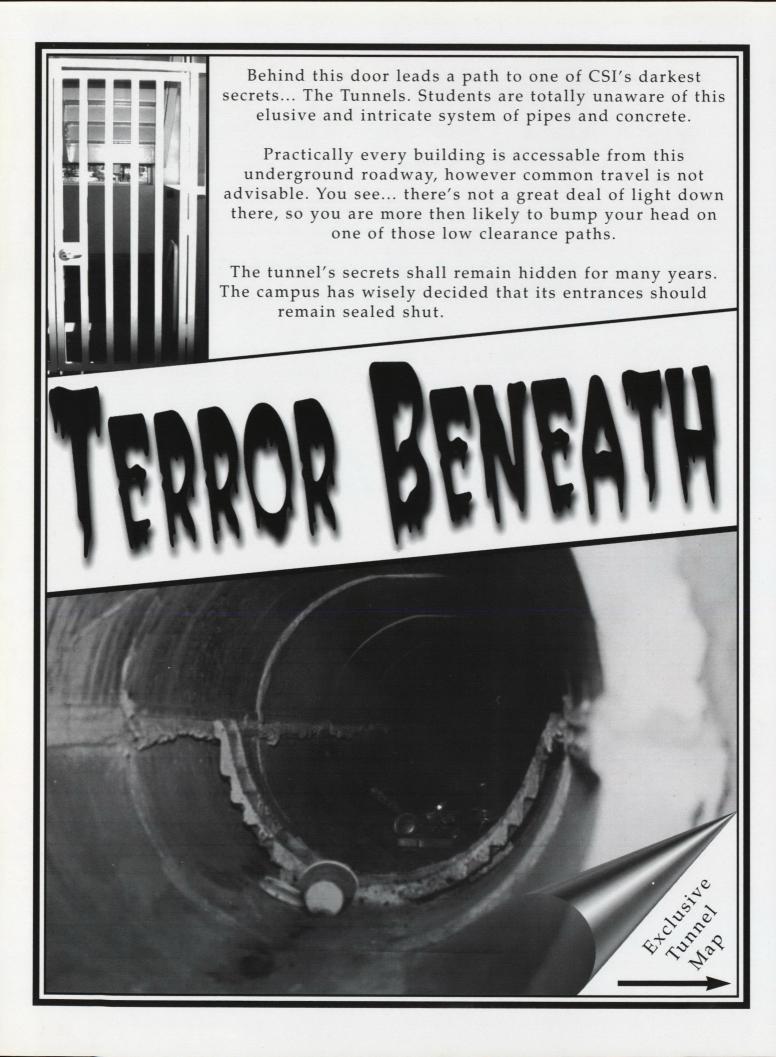

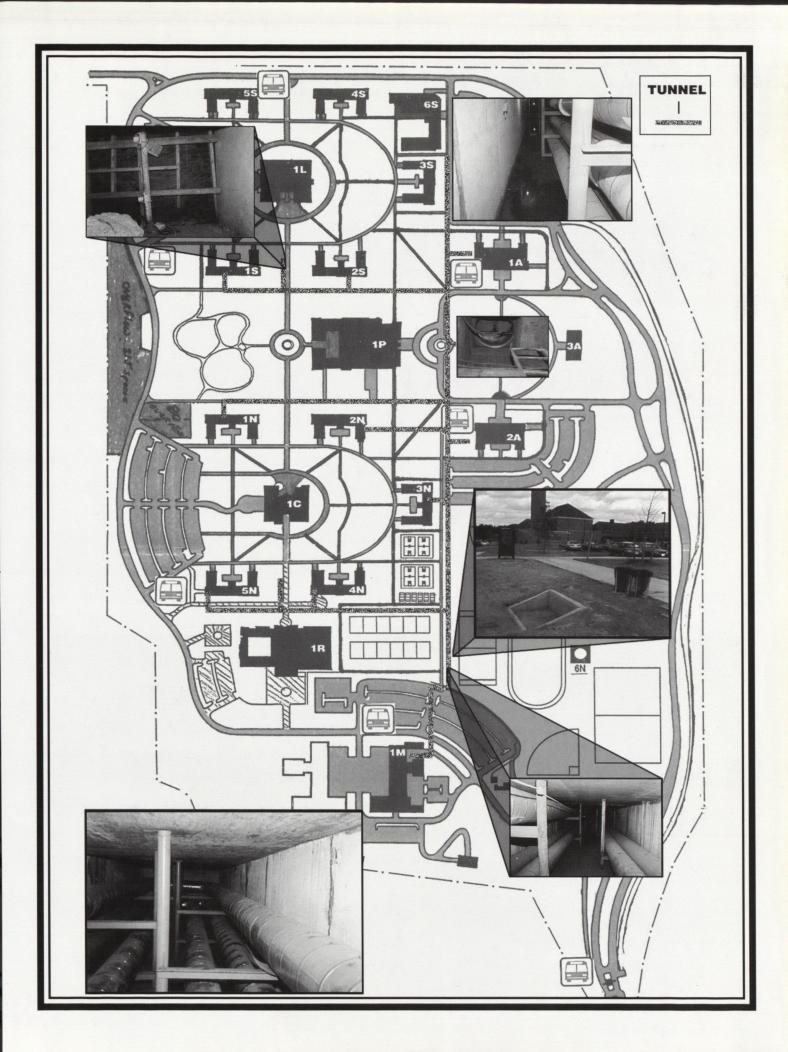

Considering Willowbrook's twisted past, it should go without saying that The College of Staten Island has had strange occurances.

The following pages exhibit only a few of these bizarre events.

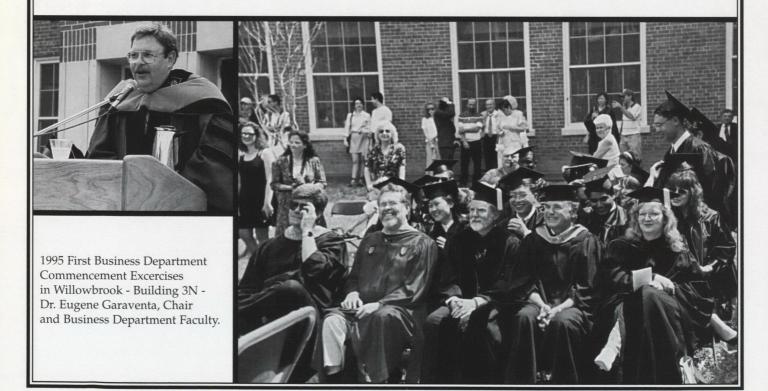

ACCOUNTING AND BUSINESS

The College of Staten Island has considerable experience in preparing students for professions in Business. The Bachelor of Science programs in Accounting and in Business were developed after careful analysis of the needs and aspirations of currently enrolled and prospective students. The College also offers accounting and business programs at the associate's level, as well as minors in these areas. All programs include the liberal arts requirements necessary for a well-rounded education.

The College's location in the business capital of the world permits regular appointment of experts in various fields of business as adjunct faculty as well as lectures by guests from business and industry. Career opportunities exist in accounting (public and private), advertising, banking information management, international business, law, management, marketing research, personnel, sales, and securities and brokerage.

The baccalaureate programs in Accounting and Business serve as a foundation for graduate study for many students. Professionals in need of retraining and returning students planning to enter the job market also find the College of Staten Island's business programs of value in pursuing their goals.

The Center for International Service

The Center for International Service invites you to share with your CSI friends and alumni the resources for international study here on campus!

CSI Study Abroad Programs

ITALY

In Rome, programs include Italian Civilization and Culture, Italian Studies, International Relations and International Business. In Florence, Intensive Italian, Art History and Studio Art.

GREECE

In Greece, Greek Civilization & Culture and Liberal Arts

ECUADOR

In Quito, Liberal Arts and Latin American/Andean Topics. In Guayaquil, Spanish Language, Ecuadorian Literature, Art, History and Civilization.

CHINA

In Nanjing, Courses in Chinese History, Geography & Culture and Mandarin Chinese Language.

ADDITIONAL PROGRAMS

Study opportunities for both undergraduate and graduate students are sponsored each summer. Balkan History and Literature in Bulgaria, Special Education and Social Studies in Denmark, Women's Studies in London, and French Language in the South of France are a few courses from the recent past. Contact us for future summer options.

FOREIGN STUDENT AND SCHOLAR SERVICES

Foreign Student and Scholar Services coordinates services for students and scholars from countries outside the U.S. Should you have family or friends from abroad who may wish to study at CSI, Our office is in Building 2A, Room 206.

THE ENGLISH LANGUAGE INSTITUTE

The institute offers intensive English and Cultural Orientation programs for international students, visitors, and professional and business people. During two 14-week semesters and three 9-week terms, students, from beginner to advanced levels, take 20 hours of instruction per week. Special workshops, field trips, and visits to the unique cultural institutions of New York City, provide an orientation to American Culture. Visit the Institute in Building 2A, Room 207 for additional information.

The Department of Modern Languages

Our Department consists of seven Full-time instructional staff members, and depending on the need, ten to twelve part-time members. We offer a Major program of study in Spanish, but we also teach French and Italian through levels three and four and occasionally the Literature and Culture courses in those languages for students opting for a minor therein. In addition, we also teach several sections of American Sign Language in Levels I, II, and III.

Recently, we opened a brand new Multimedia and A-V lab. In 2S-114, which, after a full academic year of operation, has seen a tremendous increase in usage, offering interactive, computerassisted autotutorial programs for learning the basic

by the Department, as well as grammar exercises and writing programs, including Word Perfect and printing facilities for almost any language. The students and instructional staff may also save any materials obtained on diskette, as well as peruse the Internet and World-Wide Web for information of a truly global nature.

The Political Science, Economics, Philosophy Department

The Political Science-Economics-Philosophy Department features majors in these three disciplines. We also offer a dual Political Science/Philosophy major, Geography courses, and prelaw advising. For information about our activities, please phone (718) 982-2900.

OUR FULL TIME FACULTY INCLUDES:

Economics
Robin Carey (Department Chair)
Yale Meltzer
John Osakue
Vasilios Petratos
Samuel Schwarz

<u>Philosophy</u> Chalmers Clark Peter Simpson

<u>Geography</u> Deborah Popper

Political Science
Nathan Greenspan
Daniel Kramer
Larry Nachman
Michaela Richter

OUR SECRETARIES ARE:

Jacqueline Blum Patricia Burmeister Laura Perez June Volpe

OUR SPRING, 1996 ADJUNCTS WERE:

Sal Acquista, Erik Banks, Karl Bausinger, Harry Cason, Chalmers Clark, Linda Coull, Richard Gillis, Mofakhar Hussain, Salimullah Khan, Jeffrey Kraus, Thomas LaManna, Shmuel Lock, Russell Marcus, Daniel Marien, Alan Ponikvar, Francis Silvernail, William Smith, Alma Thorsten.

ENGINEERING TECHNOLOGIES

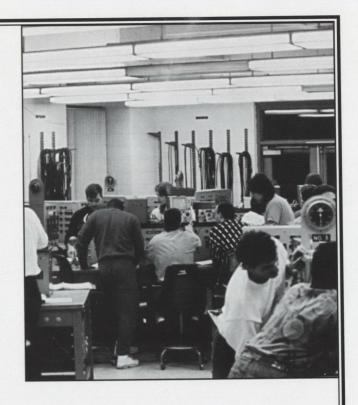

Architectural Studies

Civil Engineering Technology

Electrical Engineering Technology

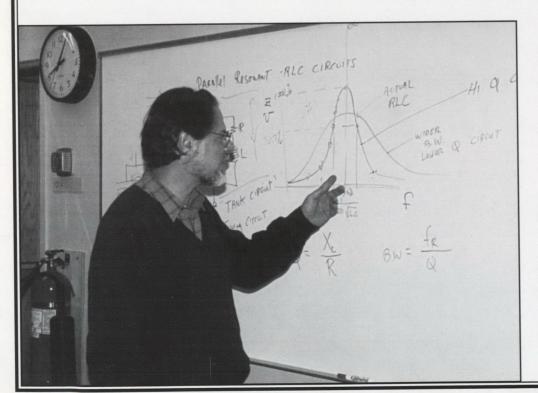

Computer Technology - Systems

Safety Technology

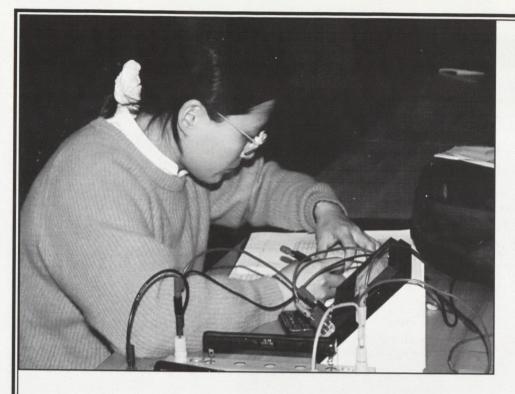

The Engineering Technologies Department of the College of Staten Island offers several Associate Degree programs.

Architectural Studies - Graduates of this program receive the A.S. degree and will be admitted directly into the third year of study in the City College School of Architecture and

Environmental Studies.

Civil Engineering
 Technology - This
 program is accredited
 by TAC/ABET
 and prepares students to build, rehabilitate, expand and

maintain the physical infrastructure of our rapidly changing society.

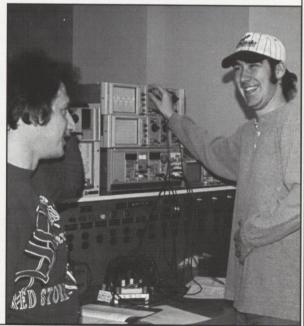

Electrical
 Engineering Technology
 This program is accredited by TAC/ABET and provides a theoretical

and practical course of student in the basic principles and applications of electrical and electronics technology.

• Computer Technology - Systems - This specially designed program offers a coordinated grouping of computer science and electronics courses. The theoretical courses are complimented with "hands on" laboratory work using modern electronics and industrial equipment. The program is offered jointly by the Computer Science and Engineering Technologies

Departments.

• Safety Technology (Certificate) - This program consists of a series of courses in occupational safety and health. Graduates are capable of advising in compliance with the regulations of the Occupational Safety and Health Administration (OSHA).

The Education Department

Education offers The Department Early Undergraduate **Programs** in Childhood, Elementary and Secondary Education, Masters in Elementary, Secondary, Special Education, and a Post Educational Masters Program in Administration and Supervision.

The Faculty of the Department are:

Dr. David Podell, Department Chair

Dr. Philip Alsworth

Dr. Joel Berger, Coordinator of the Graduate Elementary and Secondary Program

Dr. Harris Goldberg

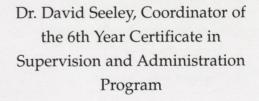

Dr. Ronald Gruberg

Dr. Jed Luchow

Dr. Christine Nucci

Dr. Theodora Polito, Coordinator of the Early Childhood Program

Dr. James Sanders

Dr. Effie P.M. Simmonds, Coordinator of the Special Education Program

Dr. Susan Sullivan

Dr. Lois Weiner

The Biology Department

Currently the Biology Department offers majors in Biology and Health Science and administers the following programs:

Bachelors/Masters Degree in:
Physical Therapy

Bachelors Degree in: Biology Medical Technology Nuclear Medicine Technologist Option Physician Assistant

Associate Degree in: Medical Laboratory Technology

<u>Certificate in:</u> Medical Assistant

The Department also participates in the following:

Ph.D., Program in Neuroscience MA in Environmental Science Biology Courses for secondary school teachers at Masters Level BS in Biochemistry

FULL TIME FACULTY

Dr. Jacqueline LeBlanc (Chairperson), Dr. Albert Burchsted (Deputy Chairperson), Prof. Maureen Becker, Dr. Sharon Bramson, Prof. Pamela Carlton, Dr. Gregory Cheplick, Dr. Leonard Ciaccio (Special Assistant to the President), Dr. H. John Clitheroe, Dr. Annabelle Cohen, Dr. Margaret Dooley, Dr. Yigal Ehrlich, Dr. Charles Kramer, Dr. Arthur Nelson, Dr. John Oppenheimer, Dr. Martin Rosen, Dr. Jeffrey Rothman, Dr. Joel Schwartz, Dr. Alvin Silverstein, Dr. Joseph Vagvolgyi, Dr. Andrzej Weiraszko, Dr. Dalia Zwick

SUBSTITUTE LINE

Mrs. Erin Jerlin & Dr. Charles Wright

TUTORIAL CENTER

Daniel Jablon & Sandi Benson

TECHNICIANS

Helen Gold (Chief CLT), Thomas Brown, Marie Larsen, Phyllis Litwinka, Lydia Livolsi, Lynn McCarthy

ADJUNCT FACULTY

Mohammed Alauddin, Laura Mazzola Alvarez, Catherine E. Anastasio, Neil Anastasio, Karen Barnett, Howard Baumel, Carla Beeber, Fred Bohensky, Thomas Bond, Diane Caravone, Lorayne Castiglione, Sara Chambers, Berta Couture, Charles Cregin, Ann Cruz, Dennis

Curley, Irmgard Cusumano, Mary DeVita, Lynda Dines, Flora Doty, Debra Engel, Daniel Espinoza, Carmel Festa, Georg Fleischer, M.D., Vincent Gattullo, Timothy Glennon, Jerome Gunnell, Michael Hogan, Daniel Jablon, Ethel Katz, Joann Kramer, Aron Lukrec, Joyce Maiellano, Garrett Malloy, Joseph Masefield, Sue Medford, Ronald Milkowski, Andrea Morville, Elayne Musnick, Maryann Nobel, Joyce O'Connor, Bruce Pachter, Janice Pattison, Sheenly Perez, Carol Pisapia-Colon, Joel Radding, Martin Rosenberg, Richard Rubenstein, Randall Saad, Diane Schmidt, Eli Shapiro, George Sideris, Linda Sapadafina, Roger Styczynski, Walter Styczynski, Denisa Trezza, Shirjay Vijayan, Janet Wassmuth, Christine Wheeler, Brian Wilkow, Hui Ai Yang

ADJUNCT CLT (Technicians)

Chris Burchsted, Karen Hagstrand, Virginia Kopetz, Lisa Marino, Teresita Mauricio, Sheila Montanti, Dibyendu Pandey, Vicki Pesci, Arthur Philipps, Helen Polichetti, Catherine Riggi, Joseph Soroka, Keith Turner

Applied Science Department

The department offers two majors, one minor and several science service courses to the Liberal Arts student population.

Bachelor of Science Degree in Engineering Science

Bachelor's degree The Engineering Science offered at the College of Staten Island prepares students to enter the Mechanical or Electrical Engineering Fields. The program emphasizes the fundamentals common to all fields of engineering and enables the student to explore and apply scientific methods to analysis and design in traditional as well as newly emerging fields. The Bachelor of Science Degree in Engineering Science represents an innovative and practical approach in engineering educa-It is a fully accredited Engineering Degree that is of foremost quality affirmed by the fact that it received accreditation by the Accreditation Engineering Commission of the Accreditation Engineering Board Technology (EAC/ABET). Students are qualified to take the first part of the Professional Engineers (P.E.) license exam when they are within 20 credits of their graduation program. The P.E. license is an ever increasing demand by industry and is highly recommended that students apply for it.

Bachelor of Science Degree in Physics and Physics Service Courses

The Bachelor's Degree in Physics offered at the College of Staten Island offers a solid foundation for students to enter the Physics profession. Physics is a fundamental science that deals with the nature

of physical reality. Approaching reality from an experimental basis the applications of the laws of physics have become essential to many fields of endeavors as well as the basis of the modern scientific revolution. Students from Science, Biology, Computer Chemistry, Biochemistry, Engineering Science and Technology, Pre-Medicine, Medical Technology, Astronomy, Physician Assistants, Physical Therapy and Nursing study Physics as a part of their major requirements. domain of Physics includes: Sound, Light, Heat, Electricity, Magnetism, Atomic and Nuclear, Waves, Optics, Motion, Relativity, Fluids, Quantum Mechanics and Astrophysics.

Astronomy

People interested in understanding humanities basic relationship to the rest of the universe study astronomy. Astronomy is also studied to seek points of contact between science and other human endeavors: philosophy, history, politics, environmental action, even the arts and religion. Our involvement with basic circumstances and our enigmatic future in the universe is part of the scope of astronomy. The latter is seen by: human footprints on the moon; radio telescopes listening for messages from extraterrestrial intelligence; technicians looking for celestial and planetary sources of energy to support our civilization; orbiting telescopes data hinting at planetary systems around other stars; a suddenly revised world order of nations struggling to repair damage to our planet; the cosmic consciousness that has

awakened us to the potential destruction of our civilization by mindless asteroids and comets that speed by us in space. The domain of astronomy courses offered at the college includes historical perspectives, Earth, sun, moon, solar system, our galaxy, the origins of the universe, birth and death of stars. Astrophysical has an Observatory where the general public can see some of the wonders of the heavens and science students can carry out research in locating near Earth asteroids and monitoring energy levels of variable stars.

Geology

Geology, the study of the earth, is a broad discipline that is interrelated with astronomy, physics, chemistry, and biology. Physical Geology is the study of the Earth's minerals, rocks, as well as the processes operating within the Earth and upon its surface. Historical Geology examines the origin and evolution of the Earth, its continents, oceans, atmosphere, and life forms. Many geologists explore for mineral and energy resources which our industrialized society is based. Geologists also help solve environmental problems, finding groundwater and monitoring it for pollution and making short and long range predictions about Earthquakes and volcanic eruptions. A minor in Geology is available at CSI. The domain of geology courses offered at the college includes Plate Minerals, Rocks, Tectonics, Volcanism, Weathering, Earthquakes, Mountain Building, Glaciers, Sea Floor and Shorelines, fossils and the evolution of life.

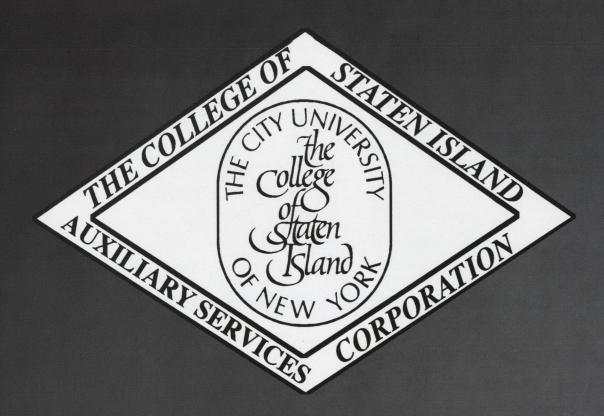

History Department

People have studied their history since ancient times, sometimes simply for pleasure, out of sheer curiosity and in delight at discovering something about their own origins, but at other times (like Cicero) they have studied their past because they believed that it was important, even indispensable, to an understanding of the present. People have most frequently thought so in times--like the present--when they faced rapid change, when the familiar world was being transformed in ways they could feel and see without being able to understand the underlying causes.

We believe your major in history will serve you well as you go forth in your chosen field of employment and in meeting the responsibilities of citizenship. **Dining Services**
