ANNUAL CLUB FESTIVAL HELD

By Yvonne Villa and Jennifer Valle

Once again, clubs gathered together in a grand festival of fund raising and cultural celebration Wednesday, May 8th at 12:00 PM. Students enjoyed free food, games, and cultural dancing from noon until 6:00 PM.

One of the clubs which helped raise funds for charity was Sigma Omega Epsilon. Member of the club, Jennifer Kary said, "We are selling baked goods and sandwiches for the Rainbow Hope Foundation- it's a charity for kids with cancer."

While some clubs helped to contribute to society, others celebrated their cultural significance. Among the clubs to perform traditional dances was the Spanish Club. President of the club, Luis Cruzatte said, "We had a dance show from Columbia which was danced by Martha Tejada and Cristian Hernandez." He continued, "We gave out free food and we had a small display of flags. It was fun and exciting, but I wish that the same amount of people that came to see us dance also came to vote."

Another club which held a cultural dance was the Union of Arabic Students. Vice President Laith Khlil explained, "We hired our own belly dancer. Club member George Musa found her in a club and we hired her for \$150 dollars to do traditional dances." He continued, "This is the first time our club has participated in the club festival." The dancer, Bianca Gonzales said, "George (Musa) called me the night before and asked me to do this, so I came." Students crowded the Green Dolphin Lounge to sneak a peek at the remarkable dancer. The club also spent \$100 for food that students enjoyed free of charge.

While some clubs gave away free stuff, others sold different items in order to raise funds for their club. Vice President of the Social Work Club, Jennifer Dewaters said, "We are selling junk food to raise money so that next semester, the club can go to Washington D.C. to check out social work conventions."

The Physicians Assistant Club also made themselves known at the festival. Soda, cookies, and popcorn were sold to promote the club. Along with free pens, they also handed out flyers that explained

the requirements to become a Physicians Assistant student. "We are the biggest club and the most organized club on campus with 170 members," said club member Jana Jankey.

Another club who worked towards fund raising was the Apolistic Christian Life Coalition. President Charlo Almeda explained, "We had a Gospel Fest where musicians played music in the Green Dolphin Lounge and we sold sandwiches from a 9 foot hero; 6ft- regular hero and 3ft. Vegetarian hero." The club also sold soda and had baked goods. Mr. Almeda commented, "The money is going to the club to offset an uncertain future by Student Government. If Student Government cuts more of the budget, at least we'll have some sort of buffer to alleviate the cuts."

The New York Public Interest Research Group (NYPIRG) also joined in the days events with their own table. NYPIRG hosted two activities at their tables. One game that was played was "Pin the Blame on Pataki," a spin off of "Pin the tail on the donkey." Contestants had to choose one: register to vote, vote in

the Student Government Elections, or call representatives at an 800 number. The other game was the "CUNY drop," where students dropped pennies into a tank of water, trying to get the coins into a glass cup in the bottom center of the tank. Stuffed animals, blowpops, pins, and pens were handed out as prizes.

At the end of the day, the festival raised close to \$350 dollars. Student John Barry said, "This Club Festival is nice, but it would be better if all classes were canceled for today's events. I'm proud of my fellow students who organized this event." Another student, Dana Azenara said, "It's a way for everyone to be together as a group, and to mix all the cultures instead of everyone being in their little groups."

Student Government President and Club Commissioner Meri Kaufman commented, "The Club Festival was wonderful as usual. Clubs came together to show their pride and commitment to students and the college; and to raise money for charity." She ended, "Most important though, a lot of students had a good time."

In CSI News...

EUREKA! It's Useful!

EUREKA!, the on-line campus information system has recently been

updated to include available courses for the next semester. "The EUREKA system was designed to help students register for classes" said Registrar Personnel Elaine Bowden. She continued, "When students need to register, they usually go to the 'Registrar's Course Status Sheet' in the 2A building. Now, they can get this information at the EUREKA! Kiosks."

Students who also have personal computers with internet access can log on to the CSI home page (<http://www.csi.cuny.edu/>) and receive this information in their homes. Before it was released on the EUREKA!, students had to rely on the posted list outside of the Registrar's office to find out whether or not a class was open, closed, or canceled. Ms. Bowden also explained that the Kiosk will be updated at 2:00 PM and at 9:00 PM every day so that students will have the most current information at the touch of the screen.

In order to get the system to the campus, Vice President Carol Jackson wrote a lengthy proposal in which she expressed the need for such a system. "The deci-

sion to have this system brought on campus was reached even before we came to the new campus" said Bowden. She continued, "When Carol (Jackson) wrote to first get the EUREKA! grant three years ago, she explained that it was a system that she would like to see- something that students can easily get information about the college from."

When it was finally granted, the department set to work on putting together the information that would go into the system. "We began little by little... first we put the course catalog on it, then we continued to add information to it each day" said Bowden.

On Thursday, May 2nd, it was finally decided that the EUREKA! system would display the course status reports. Not only does the system provide course status information, but it also has on display the academic calendar, the registration schedule, the final exam schedule, meeting times, latest room assignments, and many other timely events and information. "We feel this will make the course information much more accessible to students," expressed Bowden.

Fire Alarms Ring Over Burnt Toast

Fire alarms went off in the Campus Center Thursday, May 9th at 1:30 PM when workers tried to toast a roll for a customer. "We don't like to refuse customers, but we can't toast the rolls because they burn easily," commented one of the female workers. It took approximately ten minutes for workers to reset the alarm. Despite the blare however, students

ignored the alarm. One student Amy Schwartz said, "We get so many false alarms that the entire alarm thing has just become one major joke."

B&G Play Possum

After two weeks of deterioration, the dead possum on the side of the loop road at the entrance of the college was finally removed. The possum, a bit larger than the size of a full grown cat, was involved in a hit and run accident Friday night April 27th.

Upon seeing the twitching, half dead animal, security officers averted traffic until the animal died. Afterward, they moved the corpse to the side of the road to avoid further blood shed.

Several days later, despite garden work being done to the area, the possum was not removed. Buildings and Grounds workers mowed the lawn around the decomposing corpse on May 7th but ignored the maggot infested carcass. Three days later, when reporters tried to find out why the dead possum was left there, Buildings and Grounds office personnel explained that no official complaint was made regarding the cadaver. When asked why the workers who mowed around the body did not report it, secretary Annette said, "I don't know but we will look into it."

Campus Planning Director George Targownik expressed, "I don't know why they (B&G) ignored the possum, they're not suppose to do that. The possum should have been removed two weeks ago when the incident first happened." The possum was finally laid to rest Friday, May 10th.

By Jennifer Valle

AIDS QUILT WARMES CSI

By Jennifer Valle

Over twenty panels from the AIDS Quilt was brought to CSI for display in the Performing and Creative Arts Center Wednesday, May 8th at 2:30 PM. "We have been thinking about bringing the AIDS quilt to CSI for a while" said Vice President Carol Jackson.

The actual AIDS Quilt is located at Washington DC and hosts over 45,000 panels. Each panel consists of eight different quilts made for loved ones who have died of the AIDS Virus. Peer Education, Delta Sigma Tau, AIDS Task Force, and the Staten Island HIV Care Network worked in conjunction with the Wellness Program to bring over twenty panels to CSI.

Approximately 60 students and faculty gathered together to witness the Ceremonial opening of the quilt. Vice President Carol Jackson was the first to speak. She gave an emotional presentation about a friend that she lost to AIDS. "Michael Stolper, a dear friend of mine was among the first who died of this disease in 1982," said Ms. Jackson. She continued to explain how she and a group of friends worked on making a quilt for their deceased friend. "It was a way for us to share Michael's legacy and deal with his death," said Jackson.

President Springer addressed the audience with her own emotional testimony. "When I first saw this quilt down in Washington, I thought about how terrible and devastating this disease really is... It strikes the world," said President Springer. She continued, "The College of Staten Island is proud to house this quilt to give testimony to our undying goal towards finding a cure for AIDS."

Next to speak was NYC Commissioner of Finance/Consumer Affairs, Fred Cerullo. Mr. Cerullo came and spoke about his views on AIDS. "On Staten Island alone, we have about 10,000 people living with the HIV virus," said Mr. Cerullo. He continued, "We need to understand that this disease really knows no boundaries, and until we join together, we will not defeat this disease." Mr. Cerullo also spoke a bit about the history

of the quilt and the significance it has in people's lives,

Ginger Perez, maker of a quilt panel did a presentation with her mother titled, "If AIDS could talk, what would it say." Later, she explained that this was her way of giving a tangible face to the disease that kills so many people. "Isn't it ironic that today we are here talking about the AIDS quilt and my brother died of AIDS... Today would have been his 30th birthday," said Mrs. Perez.

Care Networker Wendy Hofner explained, "When we were bringing the quilt over, we realized that these were not just pieces of fabric but actual lives that were lost to AIDS and everyone that was working to unpack the quilt suddenly became very quiet."

Also at the event, Louisa Odone of the AIDS Task force said, "Just looking at the quilt is an overwhelming experience... each person in one way or another is affected by this deadly disease." Executive Director for Project Build, Robert Busan explained, "[The Quilt] is a way of bringing the AIDS community together in a powerful way." He continued, "This disease brings discrimination and isolation to the individual with the disease, and to the family... the quilt brings people together and helps them move forward from the sorrow that this disease brings."

In order for the quilt to be brought to the college, it cost \$2,000 dollars to ship it from Washington DC. Denise of the Care Network explained, "We worked with various groups to bring the quilt here [to CSI]. Two local banks contributed to the cost and the AIDS Service Organization also chipped in to bring the quilt to Staten Island." She added, "We are trying hard to bring people together on the AIDS Issue."

The AIDS quilt remained on display until Saturday, May 11th when it was gently packed to be shipped back to Washington. Vice President Carol Jackson said, "It truly honors the college to display such a remarkable quilt and hopefully bring awareness to the Staten Island community."

Wellness Festival

By John LaMantia

The Wellness Festival was held on May 9 from 12:00 to 6:00 in the Campus Center. It was sponsored by the Division of Student Affairs, Staten Island HIV Care Network, Program Development Committee, Health Service and the Wellness Program. The festival gave students information about health issues that may affect their lives.

There were over forty tables set up giving the students information about the March of Dimes, the AIDS Walk, the American Cancer Society, teen rape, pregnancy, AIDS, HIV, and the St. Vincent's Medical Center of Richmond. Amy Markovitz, from the St. Vincent's Medical Center table, commented that the "fair is to make students pay attention to their health care needs."

Some of the workshops offered were about HIV, AIDS, Nutrition, and the last one of the day, "To be or not to be a Vegetarian," given by Professor Richard Schwartz. These were all Personal Growth Clues. There were also free condoms and pamphlets on every health issue. One student commented that the fair was "very interesting." There was also free breast and testicular exams, cholesterol, HIV and TB testing.

The 1996 Wellness Festival gave student a chance to learn about health issues that affect their lives. It also informed them of ways of dealing with health problems that may come up in a student's life. A comment was made by Rosemare Talorice from Health Services that "the students that attended this year seem to be more aware of these topic than the students from last year."

ENTIRE CAMPUS UNDER FIRE ALARM VIOLATION

By Jennifer Valle

After three false alarms in one day, the entire CSI campus was cited by the Fire Department for failing to comply with the maintenance rules for alarm systems on Wednesday, May 1st. "Whether it's because they are over-sensitive or not cleaned properly, the alarms are going off for no apparent reason," said Battalion Chief of the Fire Department Richard J. Powner.

Director of Campus planning, George Targownik explained, "TDX and the College are in the process of obtaining final approval for the alarm system." In order to receive final approval, security was instructed by the fire department not to respond to any more active alarms, but to contact the fire department as soon as an alarm is sounded. The memo, dated April 15th, states, "... The procedure being employed whereby upon notification of interior fire alarm or smoke detector activation, security personnel are sent to verify that an emergency condition exists... is not acceptable." The memo goes on to state that the entire college is in violation of Fire Code 17-01(b)(6)- use, maintenance, and operation of the Central Station Signaling Systems.

The first of the alarms leading up to the violation occurred in Building 3S at approximately 6:00 PM on May 1st. The building was evacuated and fire trucks responded to an active alarm which was found to be a false alarm. Approximately one hour later, 7:00 PM, the fire department responded to another false fire alarm in the library. At 8:30 PM, a third false alarm was sounded in the Performing and Creative Arts Building. One student at the scene, Tanya Lopez said, "It's inconvenient. These false alarms take time away from other things that I could be doing... especially since it's finals time. These false

alarms just add to the stress."

After receiving the notice of violation, there have been approximately twelve more false alarms. The most recent false alarm occurred at the Library on Monday, May 13th at 6:00 PM. During the false alarm, two male students were stuck in the elevator on the second floor. One of the students, Richard Arroyo said, "We heard the alarms and the security officer told us that there was nothing to worry about... I thought it was kind of cool though."

Fire Fighter Billy Burke said, "It might be a malfunction in the alarm system, they (The College) are having a lot of problems with it." Mr. Targownik explained, "We were cited because of an excess number of unwarranted false alarms." According to Fire Department regulation, any combination of three unwarranted or unnecessary alarms within a six month period will be deemed excessive and in violation. Targownik continued, "99.9% of the time, these alarms are false- mostly, it's something mechanically wrong... there is a possibility that the alarms are being set off by people smoking in the buildings but we have no evidence of this."

In order to resolve this infraction, the college has brought in G. S. Edwards, an outside organization who will deal with the maintenance of the alarms. "G.S. Edwards will be coming regularly to check on the system. They will improve maintenance and clean the alarms as required by the fire department so that they don't go off on false alarms" said Targownik.

Despite the violation, there is no danger of the system balking during a real emergency. Targownik said, "I think the alarms are very sensitive right now but if there is a real fire, the alarms will go off, and they will work. I don't think there will be a problem."

Hello From Ecuador

By Mary Jane Bensick

My trip to Ecuador not only gave me new insight, but extremely expanded the view of my potential as a human being. This journey was utterly inspiring. I dreamed of having a wonderful experience, but I had no idea how it would change me. It literally opened me to view the world and myself with new understanding.

The orientation gave me a perfect segue into Ecuadorian life. I felt quite comfortable about the experience I was going to have. My host school institution taught me how much I take for granted in the United States, and our school institutions. For example, their classroom and bathroom facilities opened my eyes to the many items that I considered necessities, but were luxuries there. The students there had far less creature comforts and yet the people were incredibly gracious. The instructors seemed well educated and were extremely sensitive to my inability to speak their language at the class's proficient level. They were quite helpful in guiding me to not only speak Spanish at a higher level, but also learn an abundance about the culture.

My accommodations were absolutely fantastic. Besides what information I gained in my college courses, I think my other great learning experience was having the

ability to live on a day to day basis with an Ecuadorian family. I shared not only their language, but their society and social customs. It was an amazing privilege to be a part of the family unit. It is a memory that will live with me always.

Because of the above stated, I want to advocate to the undergraduate student the importance of studying abroad. The independence, confidence, and education that I obtained in Ecuador could never be taught in any classroom. I would like other students to take advantage of this special program that gives college experience, as well as a remarkable life experience.

I would like to thank the staff at the Center for International Service at the College of Staten Island, as well as the staff at the Laica University in Guayaquil, Ecuador. I would also like to thank the CUNY study abroad (STOCS) scholarship program for making my educational experience possible. The whole is the sum of its parts, and I could not have had this experience without all of them helping and working together to make my travel special and life enriched.

(Mary Jane Bensick participated in the January intercession program in Guaya Ecuador. She is a Freshman Spanish major at the College of Staten Island.)

All My Sons: On Campus

By Alice Marino

Arthur Miller's *All My Sons* was performed in the Williamson Theater on April 18, 19 and 20. Directed by Robert Hulton Baker of the English department, all but one of the cast were CSI students. Professor Baker of the English department said, "It was the first contemporary drama (he directed at CSI) except one from the *theatre of the absurd*, and that was 4 or 5 years ago."

The stage was set at the Keller's home with a narrow house, picket fence and bodega. The supplies were donated by Farrell Lumber. *All My Sons* is a play about a man's greed. Joe Keller betrays his family, friends, and ultimately many young men who lost their lives. A fallen tree represented the Keller's oldest son, and the breaking of the illusion that he might live. Mr. Baker said he was "attracted to the piece because it addresses many issues in the 90's, such as the indispensibility of individuals and corporate ethics - take overs, downsizing,

and the dollar motive as the bottom line. Effects upon family individuals and society are overlooked in the pursuit of these other goals."

The cast rehearsed for 6 weeks according to Professor Baker. Although the first scene was a little slow, the play built to a brilliant tension by the end. Some of the players were more powerful than others, particularly Barbara Grigoli (Kate Keller), Ritty Mahoney (Chris Keller), Lori Seggio (Lydia Lubey) and also Jim Mc Vey (Dr. Jim Bayliss). Ritty Mahoney said afterwards, "I learned that this school has wonderful resources for comedy and drama both in equipment and human potential. I wish the students were given more support by the superstructure. I'd like to see more student productions in the theaters."

Next September Professor Robert Baker will be auditioning for another play. He did not give a title but mentioned the possibility of a "musical component."

Using 1990's Technology to Emulate 1980's Games

By Richard Arroyo™

Tired of the seemingly endless wave of mindless Doom clones? Did you just buy a \$2,000 dollar computer set-up and find yourself longing for your old Commodore 64 that's sitting in your closet? Well thanks to advances in modern programming techniques, and processor advances you can have that Commodore 64 in your computer again. Through the miracle of emulation you can have that Commodore and many other classic computer game systems right on your home computer.

There are many Internet Web sites that are dedicated to system emulation but the best site is Dave's Video Game Classics (<http://www.csun.edu/~hbbuse08/classic.html>) which has Links to all the emulators. Here you can get the Colecovision emulator. The emulator and over 100 games are available at this site. Finally, you can play Smurf Adventure again.

While you are at Dave's page you can download a copy of the "Virtual GameBoy" (VGB). The VGB is a GameBoy emulator! Since the GameBoy is still being sold and games are still being made it is extremely difficult to find games for it. You can try to FTP to 129.22.243.41 but as of this writing it appears to be down. Included with the emulator is instructions on how to build a machine to turn your carts into ROM images that you can use with the VGB.

At the bottom of Dave's page is a link to Dave's Commodore 64 page. The Commodore 64 is the most popular emulated system on the net. Many of the games that you remember are available from Archorn to Commando. At this page you can find many classic games and Commodore music files called SID. If you want to play the songs you must download SidPlay which is also available at Dave's page. You can also try Sushe's C64 Stuff

(<http://www.uq.edu.au/~chjdendl/sush/c64.html>). This is great site to download games from and find links to other C64 sites. If you are interested in finding emulators for the Spectrum and Amstrad (2 computers that we popular in Europe) click on the 'Back to Main Page' link at the bottom of Sushe's page.

Those of you who hated the Commodore 64 probably owned either an Apple II or an Atari 800. Well your in luck these systems are also emulated. A great

site for Apple II stuff is Digital Nostalgia (<http://www.umich.edu/~webspin/games/emulators.html>) Here you can get the emulator and lots of games. The Atari emulator can be found for the Macintosh at The Rainbow Info page (<http://www.cityscape.co.uk/users/jx91/rainbow.html>) and for the IBM at Branch Always On-Line (<http://www.halcyon.com/brasoft/index.html>). Games for the Atari are hard to find and if you find any please come up to The Banner and tell me.

There are currently 3 commercially available emulators, the Atari 2600 Action pack from Activision (<http://www.activision.com>), the Commodore 64 Action pack also from Activision, and William's Arcade. There are 3 Atari 2600 packs out and is a decent way to get some cool old games. I personally am waiting for a real emulator to hit the net. The Commodore 64 pack is a waste of time in my opinion since you can get a real emulator and the same games for free from the net. William's Arcade is an emulator of many classic arcade games. William's Arcade contains Sinistar, Bubbles, Joust, Robotron, and Defender. This is diffidently worth a purchase since these are the actual games from the arcade sounds and all. For more info go to the GT Interactive web site (<http://www.gtinteractive.com/>).

There are also other systems that you can find on the net. There is the MSX emulator. (Side note, the MSX was an attempt in the early 80's for some big Japanese electronic companies to create a home computer standard.) If your interested you can get it from Dave's page. There are also Super Nintendo and Nintendo (8-bit) emulators. The Super Nintendo emulator requires a Pentium with 16 megs of RAM minimum and is not supposed to work that well anyway. The Nintendo (8-bit) emulator exists but I have yet to see one. There is a Vectrex emulator that is in Beta-stages and works but you also need a Pentium. There are also rumors of a Sega Genesis emulator but it's supposed to run crappy. Hopefully someday there will be an Intellivision and Sega Master System emulator soon.

Well I've given you the starting points now you can play all the old games that you grew up with. But, don't throw any of your old systems away just because you have them emulated.

Turning Points

Perhaps I've been running in a circle
 This can't be pointless
 There have got to be two exits
 Either I go back to where I came from,
 (But no one wants familiarity
 That was less than half good
 Otherwise I'd still be there)
 Or I find the hidden door:
 Progression to the new circle - cycle
 My goal is to leave the spiral
 Trailing and spinning behind me.

Enraged Against Senseless Act of Vandalism

By Alex Geraghty

Just the other week on my way to class in building 1S, I was walking up the stairwell, when something caught my attention. A foot wide hole in the wall "greeted" me as I headed up the stairs. This was not the first display of senseless vandalism I have seen on this campus. All too often as I walk through the various buildings at this school, I notice various holes that were kicked in the walls, or loads of graffiti in the bathrooms and on the desks. As a matter of fact, one of my classes in 3N-113, a computer lab, has computers with graffiti written all over the keyboards and monitors, not to mention a few broken mice. It is a shame and disgrace that students find the need to trash this campus, considering this campus is only a couple of years old.

A lot of you reading this may be thinking, "who the hell cares and why is guy bothering us with this senseless drivel?" Well I don't know about you, but I dislike the idea of going to a school that bears such a resemblance to the abandoned projects in Newark, NJ. The whole point of relocating here was to attend a college that looked more like an institution of higher learning.

I feel that this senseless acts of vandalism come from people with too

much time on their hands, and little regard for who this might effect. I doubt very much that these same unscrupulous individuals would get away with trashing their own homes, so I ask, "why destroy something that was built for yourself, and your fellow students?"

I don't know, maybe I am the only one that wants to study at a clean and attractive campus, and not a ravaged wasteland. I am pretty sure a lot of students agree with me when I say that we need to take better care of this place, or else we will only be fueling the administration's fire in the upcoming budget cuts.

If you do feel the need to trash something, trash your own stuff at home, and not what belongs to the student body as a whole.

These vandals really need to find an outlet for their frustrations, maybe they should join a club or something, or perhaps workout in the gym, (God only knows why more people do not take advantage of this multi-million dollar facility.) Well whatever you decide to do on your spare time, just do not go around and destroy what does not belong to you, besides with the tuition hike and budget cuts, we do not need to give the administration here any more ammo to argue for the raise in tuitions and cuts in student services.

CSI Holds Third Annual Women's Conference

By Alice Marino

On April 27 the CSI Alumni Association and the Women's Studies Program held the Third Annual Women's Conference, entitled "Difference: Does It Matter?" Professor Electa Arenal of Modern Languages explained that women "have always viewed each other through binoculars - separate and clear." She continued, "Now we need to use a kaleidoscope to see all the differences. Can we keep all our differences without killing each other?"

The gathering began at 9:00 am and ended at 5:00 PM. Approximately 75 people attended. The luncheon was \$10 for students and \$40 for Alumni. Those who wished, could attend the lectures and workshops for free. Participants chose one of six workshops in the morning.

English Professor, Nancy Bogen led the "Publishing Poetry and Short Stories in Little Magazines" workshop. According to Margarita Muinelo, a student, Ms. Bogen described how to write cover letters, and distributed a book "Directory of Literary Magazines". Ms. Muinelo said, "It was very generous of her to give a guide to small magazine publications, to all that attended."

Professor Judith Stelboum, of the English department held the workshop on the "Significance of Lesbian Identity." A student, Linda Sharib said she was, "glad to see that the topic was even raised on campus because the student body tends to be somewhat homophobic. I think there needs to be more diversity and acceptance; And if you speak about these diversities, you need to speak more unilaterally in that no one gets to judge which diversities are acceptable."

Carol Pavin, a psychotherapist, led the discussion on Women and Codependency. Ms. Pavin explained that there are certain things women can do to prevent codependency, such as: writing out likes and dislikes each day, and paying attention to feelings. She said, "Women are conditioned to be the caretakers and therefore are blamed when things turn out badly. Forgetting one's self results in codependency. A relationship with one's self is most important." Carol Lombardo, a member of the Staten Island community said, "I learned that women who are caring and nurturing are not necessarily codependent. It's only codependency when it's carried to the extreme-" such as forgetting one's own needs.

Seven afternoon workshops were offered. Vita Paino, a student, described the portion on "Women with Disabilities", "Basically all the women talked about obstacles in society. They really were double minorities because they were disabled women." Ms. Paino was particularly concerned because many of the women had been discouraged against continuing education simply because of physical limitations.

The workshop on "Sexual Harassment: Where We're At, Where We're Going" was led by Professor Beatrice Kachuck, Women's Studies / Education, CUNY Graduate Center and Brooklyn College, and by Professor Lilia Melani, founder of the Women's Coalition and also

of the English Department at Brooklyn College. Everyone received copies of the CUNY policy against sexual harassment and also the procedures for implementation of the policy. The hosts pointed out many holes within the documents because of unclear terms such as: unreasonable interference of an individuals work. Ms. Kachuck asked, "Who decides what is unreasonable; How much is unreasonable?"

The afternoon workshops concluded the days events. The need for the Women's Conference was summed up by Professor Electa Arenal of Modern Languages, "we (women) need to master the masters tools by either stealing them or making our own."

Students Turn To Job Hunting On The Internet

By Colleen DeBaise
College Press Service

Leafing through classified ads. Trekking across campus to the career center to check the latest job listings. Mailing out stacks of resumes.

To Sara Sutton and Rachel Bell, it didn't make any sense that job hunting should be such a hassle. So, the two college students decided to do something about it.

Sutton, a junior at the University of California-Berkeley, and Bell, also a junior at Hobart & William Smith Colleges, took a year off from school to establish JobDirect, an Internet-based placement service that officially launched in mid-May.

"We were talking about this whole job process," said Sutton, of herself and Bell, a childhood friend. "We saw the stress of the job hunt."

With JobDirect, students can fill out an online resume form, listing information such as their major and activities. They also can check their area of interest, whether its business, law or sports. The information is stored in a database for companies to peruse, and can be updated by the student at any time. Also, the site's database sorts through job listings and places good matches in student's in-boxes, Sutton said.

To date, she and Bell have recruited 25-50 companies—larger ones like AT&T and Xerox, as well as small- to medium-sized businesses—who plan to use JobDirect. Their site joins a variety of other career placement sites already on the Net.

Increasingly, students are turning to the Internet for their job search, as more and more companies are tuning into cyberspace to recruit employees, say college placement officers.

Jeannette Fromm, a graduate student in computer science at the University of Dayton, accepted a job offer as a programmer after only a two-month job hunt, conducted entirely online.

"The previous times I had been looking for a job, I would have to go to the [UD] Placement Center during the hours they were open, make copies of job listings and take them home to work with," Fromm said.

But this time, by checking web sites created by variety of career placement services, she was able to switch on her computer and look for jobs at any time of the day—whether it was in the morning before classes or late at night.

Job searching on the Internet has been increasingly popular among students in the past six months, according to Sue Borgert, assistant director of job development in the UD Career Placement Center. More companies are posting job listings, more web sites are offering job searches, and more students are using the 'Net to post their resume and land a job, she said.

Chris Wiley, who works with UD alumni searching for career opportunities, said that when job listings first began to appear online, they were primarily for technical positions. "Now we're seeing more and more of any type of position," she said.

Students increasingly are

using the Internet because job listings are constantly updated and available 24 hours a day, Borgert added.

By using the Net, job hunters also demonstrate that they have skills in online research, a relatively new talent that many companies are seeking, she said.

A student can check out the variety of job placement services on the Net by clicking on a search engine such as Yahoo or Excite, then using a keyword search such as "jobs" or "careers" For example, the site CareerPath was created by six major newspapers, including The New York Times and The Washington Post, and features more than 40,000 job listings.

NationJob's site features a little guy named P.J. (that's short for Personal Job)Scout, who will find job listings that match a user's credential and send them via e-mail.

Other sites, such as College Grad Job Hunter, which describes itself as "your link to life after college," give advise on resume writing.

Chris Wiley of the UD Placement Center cautions students to be careful about what information they post on the Internet, and suggests using only an e-mail address rather than a telephone number or home mailing address.

Also, the ease and convenience of using the Internet may be misleading, Wiley warns. The Internet services should supplement, rather than replace, conventional job-hunting techniques, such as networking and looking through classified ads, Wiley said.

"It's an added tool," she said. "Anything more you can do to have your resume exposed to more companies is going to be a plus."

Where The Jobs Are

JobDirect

<http://www.jobdirect.com>

This service is geared specifically toward college students and allows users to fill out an electronic resume form. The resume is then stored in a database, which companies can peruse. Students also receive job listings in their in-box.

Job Trak

<http://www.jobtrak.com>

Bills itself as the nation's leading job listing service. Job Trak is partners with hundreds of university career centers and utilized by over 200,000 employers. Over 700 new jobs posted each day.

CareerPath.Com

<http://www.careerpath.com>

Features more than 40,000 help-wanted ads from six major newspapers, including The New York Times, The Washington Post and Chicago Tribune

College Grad Job Hunter

<http://www.collegegrad.com>

Describes itself as "your link to life after college" and gives advice on resume writing.

NationJob

<http://www.nationjob.com>

Provides thousands of job listings and a feature called P.J. (for Personal Job) Scout, a little guy who will find job listings for you and store them in your e-mail account.

Career Shop

<http://www.tenkey.com/CareerShop.html>

Offers a plethora of job listings and allows searches based on job title, salary, experience, geographic area and key words.

E-Span Inc.

<http://www.espan.com>

Obtains a personal profile and matches jobs with your credentials.

Presidential Politics: Clinton and Democrats Shut the Senate Down

By Joseph J. Canale

President Clinton and Senate Democrats have apparently learned nothing of past government shut-downs. For almost a week, the Senate has been deadlocked over the repeal of the federal gas tax, as well as a hike in the minimum wage and the Team Act. In the latest display of inexperience and lack of initiative, Senate Minority Leader Thomas Daschle (D-SD) has failed to take an active roll in moving the country forward. Daschle vowed to reporters "that we will shut this place [US Senate] down". Daschle and the rest of the Senate Democrats have filibustered any and all action on these issues so far, with three cloture motions already failing.

President Clinton spoke on the issue charging. He stated, "Republicans are putting poison pills in the legislation so that I will be forced to veto them and are doing this for political gain". Upon hearing this, Senate Majority Leader (and Presidential hopeful) Bob Dole (R-KS) responded by saying "those amendments aren't poison pills, they're good medicine for the country". In an attempt to rise above petty politics and move toward progress Dole has offered separate votes on all three issues. To appease and work with the White House, Dole has said he will solve the problems of amendments (poison pills) all together. He said that no party would offer amendments to the bills. Upon hearing this Senator Ted Kennedy, (perhaps the biggest wind bag in the US Senate), stood up and said he would filibuster the notion of not

being able to offer amendments.

It seems to me that Clinton and Senate Democrats should really get their act together. You have Republicans saying to the President we'll compromise and give you three separate clean votes without amendments, however, the democratic attack dogs in the Senate are not prepared to heel to this effort. What's more disturbing is that their master in the White House isn't asking them to. I must say my heart goes out to Dole and the rest of the Republicans. They're trying to do the right thing for America by working with the White House, even when Daschle and his crew are just filibustering everything.

If you think about the three pieces of legislation being proposed, you'll find they are all pretty important. We have the Team Act, a bill which would allow nonunion businesses to establish support seminars for their workers. The groups would educate workers about the importance of labor utilization, maximum productivity for company success and ultimately job security. This is as well as other common concern issues. (Collective bargaining is not related to this and would still lie with government intervention with relevance to labor disputes.) This legislation is by any means a good provision for the American working person.

Another issue on hold is the minimum wage increase. Again if the minimum wage went up, there would be people who this will help for obvious reasons. I mean think about it, Clinton passed the highest tax increase in history... maybe Americans should get some of

it back.

The last issue is the repeal of the federal gas tax. I feel this is the biggest issue. In my life a break at the pump would be great. I drive a muscle car of the 80's and have to commute from Brooklyn to Staten Island five days a week. I would really appreciate if I could pay less.

I feel all the issues that are caught up in the gridlock are important to America. I also think the President and Senate Democrats are wrong. In my opinion, the approach of shutting things down is pathetic. I felt that way when the government kept shutting down over the winter, and I feel the same now. When Republicans were said to have shut things down, their polls went down and Gingrich was muzzled. I think if Clinton and Daschle don't get there act together, stop their partisanship with Republicans, and don't start working for America, they will find their polls falling and their incumbent losing the White House. On the other hand, if the Democrats keep acting irrational and don't get a consensus on their positions, maybe we'll see a new President taking us into the new millennium.

In closing both this article and the year, I hope these articles about politics have served the CSI community well. I hope my work has enlightened people about the mess of the political system. Before I sign off I would like to thank *The BANNER* for affording me the opportunity for writing these articles and for those who read my pieces.

An Overview Of Some CSI Clubs

By Xiomara Cabrera

The Club Festival on May 8th was one of the best displays of participation from a majority of CSI clubs. There was food, music, performances, and a lot of fun. I felt the urge to highlight the positive activities:

- Sigma Omega Epsilon (a Greek Letter Organization (GLO) that is a club actually working on a beautiful project. They're raising money for "The Rainbow's Hope Foundation," an organization that helps babies and children with cancer. President Maria Cosentino told me that the GLO "also participated in the Aids Walk-a-thon". This club also does "Toys For Tots" every Christmas.

- American Macintosh Gamer's Club. They were the focus of attention with students who like to play video games because they had a contest with a prize of fifty dollars worth of game tokens. "The purpose of our club is to relieve stress from the everyday classroom work", said the

President of the club Yvonne Villa. Another activity they took part in was the "Marathon - A - Thon", giving students the opportunity to enjoy themselves in healthy ways.

- The Indian Club is one that really caught my attention. Students Kirthi, Dixit, and Sarika Sapra performed a dance from India, showing the traditional costumes and rhythms of their country. I think this was a good cultural activity.

- The Physician Assistant's Club also took part in the event. Their secretary, Bruce Connell, said that their club's purpose is to help students who are majoring in Physical Health. During club hours they made arrangements to bring quest speakers that informed and enlightened people on Physical Health in general. Member Jana Jankey said, "We are a very large group right now. We have about 170 students enrolled."

- The Apostolic Christian Life Coalition is club that I'm very happy is in existence. In this club, Jesus is the

center and the surroundings because everything they do has to do with the Lord. By selling literature from the Bible they want to get students to read and learn about Jesus. Lemuel Ayudutd commented, "We want everyone to accept that they need Jesus in their lives."

- The Spanish Club is one of the most rapidly growing organizations growing on campus. This is because they have a President that works very hard for them and the College. Luis Cruzatte is interested in everything that concerns this school. He said, "Our club is not only for Spanish students, we like to help students who are taking Spanish as much as we can."

Our College has many more clubs that offer students a variety of activities. I'm sure that all clubs are doing their best for students by providing them a place to make new friends, learn about College, life, and to have a good time while getting an education.

Late Night with Ed Sullivan

By Jennifer Valle

Assemblyman Ed Sullivan came to CSI Thursday, April 2, during club hours to speak to the students regarding Pataki's latest recommended budget slash for CUNY. Sullivan dazzled the audience with his witticism about how a cut to CUNY is a downsize to businesses... as if this were some grand revelation to the students present (all ten of them!)

Mr. Sullivan jovially continued with pun-filled comments concerning businesses needing educated workforces (after seeing the way things are run by the government, it's obvious that an EDUCATED work force is needed). Sullivan appeared to be the much needed miracle worker within the system, going as far as to suggest that students threaten other politicians by campaigning for "friends of CUNY." In a nutshell, Mr. Sullivan was trying to insure his seat on the assembly by telling students (yes, all ten of them!) that he is one of the "friends" we should vote for. Sullivan offered no real hope except to say, "Well, thanks to me, we've got about half of the money restored..." It is indeed a sad day when a public figure needs to make it known to his constituents what he has done in lieu of relying on reputation such as

Assemblywoman Elizabeth Connelly. Great political strategic, but I don't buy it for a second Sullivan.

Business does not want to downsize CUNY, they want to make it more competitive for current students, while shutting out the poorer students. Pit one student against another, confuse them so that they remain unorganized. The best way to fight this is to make sure people are not intimidated by one person. Pataki made a stupid, fiscally irresponsible, and politically suicidal proposal. Nothing is written in stone. During last year's proposal, CUNY officials were absorbing cuts that were not yet made. This is a sure sign to a nearsighted businessman that a certain cut will be tolerated. Pataki played a game. He figured he would make a proposal with an astronomical cut, wait for any preparations made within that certain department to accept a cut, and then cut appropriately. It's kind of like trying to sell a broken down car to a rube. You ask them how much they've got in their pocket and then adjust the price of the worthless vehicle to the exact amount in the rube's wallet (as a favor of course). Pataki played us for rubes and hopefully school officials won't make that mistake again.

Our job as the working class is to show that we are a large population with a huge voting block; a block

which will be the deciding factor for candidates. We hold the power here, not Pataki. People need to realize that decisions aren't made by one, but by a majority (This isn't total anarchy you know.)

If I can make a metaphor for a minute, your tax dollars are your "investment" in the city. The City is your "business". You hire (by election) an "accountant" to keep the books. If that accountant makes detrimental cuts to your business, you fire him... it's that simple. If you don't take a stand against these cuts, and if you don't use your vote, then you deserve to be cut because it's your own damn fault. The only problem with Sullivan, "the entertaining wonder", is that he was too busy patting himself on the back to make this apparent.

The entire forum was basically an excuse for soda and cookies. Sure, people got to voice their anger. Hell, we're all angry with these cuts. But the effective way to insure restoration is not to bitch and moan to people who already know you're mad, but to actively raise a hand against those who oppose you- those government snobs which you hired... and have the power to fire. To close, maybe five people will read this commentary and then they use it to wrap dead fish; but before you do, think about what you've read.

How to Overcome Doubts about God

by Steven Guzzi

"And we know that all things work together for good to them that love God, to them who are called according to his purpose." (Romans 8:28) While we are going through college (as well as life) we might doubt God, especially during hard times. The above promise is in God's Word, the Bible, and God can't lie (Titus 1:2).

Therefore, why do so many of us fail to believe in this promise? Why do we doubt that God can and will do what He says? We doubt God on many levels. We might not believe in the Bible in some ways, thus our doubts about God are well founded since we have no promises about God's love and concern for us. We are disbelieving in the only source that makes claim to a personal God who makes those kinds of promises to us. If we have an un-biblical view about God, we'll doubt God.

The prerequisite for ridding one's self of doubt is a personal relationship with Jesus Christ. This comes through believing the Bible's declaration that sin keeps us from a fellowship with God in this life and entering into heaven in the next (Romans 3:23, Isaiah 59:1-2). You should accept God's solution to the dilemma by believing Jesus Christ died on the cross to pay for our sins and rose again so that we might be reinstated into God's family (1 Corinthians 15:3-4). If you truly ask Jesus to come into your heart as your personal Lord and Savior and believe he died for you, then God will pardon you by *"the blood of Jesus Christ his Son cleanseth us from all sin"* (John 1:7). You have a new relationship with God as he becomes your heavenly Father (John 1:12).

Once you are in his family, you'll have new desires to get to know God more personally. You'll get to know Him better by communicating with Him through prayer and letting Him talk to you through reading His Word, the Bible. Faith is increased as you hear the Word of

God, whether you read the Bible, hear it being preached, taught at church, or some other setting. *"So then faith cometh by hearing, and hearing by the word of God"* (Romans 10:17).

We are also commanded by God to attend a good Bible-believing church regularly, in which we can hear God's Word preached and experience His dealings with other believers so that we may be encouraged. This offsets all doubts. It's essential that you keep your eyes focused on Jesus Christ (Hebrew 12:1-2), read God's Word, pray daily, experience fellowship with other believers, and draw near to God so that he can draw near to you (James 4:8).

If you are struggling with sin, ask God to help you repent. Sin keeps us from enjoying fellowship with God and it's the lack of fellowship with God that is a cause of doubt. As you get your saviors' perspective of things, which obviously is bigger and more clearer than yours and mine, your faith will grow. As you get to know Him and learn more of His ways, you'll realize that He'll be there for in every struggle and that He can be trusted. You'll also learn from the Bible and experience that trials and problems are placed in your life to draw you closer to God and to show His sufficiency in all areas of your life. The end will give you peace, joy and happiness (1 Peter 1:7).

If you have any doubts about the love and concern of God, there is one thing to remember. Do not quit on God, read the Bible passages that confirm God's love and look at the proof of His love in history, as He stepped out of heaven and took upon himself the form of a servant to die on a lowly cross, sacrificing his own life for yours (Philippians 2:5-11). Thus, Calvary's cross is the demonstration of God's goodness and love to you and me, and an understanding and belief in it helps to distance doubt. *"But God commendeth his love toward us, in that while we were yet sinners Christ died for us"* (Romans 5:8).

LETTERS...

To: THE BANNER
From: ROBERT LAURO
Date: May 6, 1996
re: littering solution

Walking through campus between 7 & 8 a.m., I was sickened by the amounts of bottles, cans, papers, and ordinary garbage blowing about by the entire campus. I mean all around, the campus center, fountain area, and walkways. Of course, this is just a continuation of what we see outside our campus gates. However, that doesn't mean we have to put up with the pigs who feel that they have some "right" to foul our campus. Appeals don't seem to work, so I propose that these slobs be held accountable for their "piggyness" by paying a fine each time they are cited for littering. The current parking and security staffs should be given citation books for this violation. A \$5 fine assessed for the first offense with \$5 increases for each subsequent offense. This would mean someone who has been ticketed twice would pay \$15 for the third time, \$20 the fourth etc. Perhaps appeals to the wallet will do what appeals to reason do not.

Why all this fuss about Jesus?

by Steven Guzzi

"But I fear, lest by any means, as the serpent [devil] beguiled Eve through his subtlety, so your minds should be corrupted from the simplicity in Christ. For if he that cometh preacheth another Jesus, whom we have not preached, or if ye receive another spirit, which ye have not received or another gospel, which ye have not accepted, ye might well bear with him" (2 Corinthians 11:3-4).

You might wonder why I write so much about Jesus, sometimes I probably sound like a broken record. My message is simple, the gospel of Jesus Christ from the Bible needs to be believed for your salvation. All this talk about Jesus might bore you. Maybe you have heard it all before, but as the previous verses reveal, it is easy to complicate the message of salvation like many religions have done. You have never heard me preach for any specific denomination of Christianity, things you are to do, or not to do. I have never said that you must be baptized, go to church, be a good person, or do religious things to get to heaven because none of those things can get you to heaven.

During this semester my message has been simple, *"Believe on the Lord Jesus Christ and thou shalt be saved"* (Acts 16:31). Salvation doesn't come through good works, but is a gift given by the grace of God coming through Jesus who purchased eternal life with His own blood on the cross (Ephesians 2:8-9). There are many perversions of the gospel that say good works are needed in order to get to heaven, but faith in Jesus alone is sufficient to save you, nothing else is needed. That's the simplicity of it. Good works are something you do after you are saved, which helps prove that you have come to true faith in Jesus (James 2:18).

Also, there are many current trends that seek to reinvent the traditional Jesus of the Bible, down grading Him to just a prophet or a

good religious man. Like the Apostle Paul, my fear is that your mind too may have become corrupted by the devil's deceits so that you might not accept the Jesus of the Bible, but some watered down politically correct Jesus who accepts all beliefs. However, nothing could be further from the truth. Jesus demanded a belief in Himself as the Son of God and Savior, but a false belief about a weak—liberal Jesus who accepts all religions constitutes a false Jesus. A false gospel that can't save you and isn't based on the scriptures, but is from an unbelieving spirit. The true gospel and the true Jesus is in accordance with the all the scriptures. That is, Bible alone and in its entirety, which is the complete—perfect Word of God. The Apostle Paul says this: *"For I delivered unto you first of all that which I also received, how that Christ died for our sins according to the scriptures; And that he was buried, and that he rose again the third day according to the scriptures"* (1 Cor. 15:3-4).

If you have been reading my articles, but haven't yet trusted Christ as your personal Savior I must ask what are you waiting for? Salvation is for you. If you were to die unsaved without Christ you'll go to hell for sure. Since you don't know if you have another day why tarry? It is high time to awake out of your spiritual sleep and receive Christ. The message is urgent, it always has been. I don't want to see anyone of you wind up in hell, but your sin (and we all are sinners) will send you there unless you cry out to God and ask for mercy. Ask Jesus to save you based on his death on the cross which paid for your sins. Personally pray this prayer in your own words, even now and if you really mean business with God, he'll see your faith in Christ and save you, even at this very moment. *"behold, now is the accepted time; behold, now is the day of salvation. As though God did beseech you by us: we pray you in Christ's stead, be ye reconciled to God"* (2 Cor. 6:2; 5:20).

TomKo on Beer: Summertime is the Right Time for Wheat!

By Thomas C. Kolakowski

Well folks, another semester is drawing to a close and soon many CSI student's attentions shall turn from school work to a more relaxing subject of study... beer. It is a well known fact that as the temperature begins to soar people will invariably reach for an ice cold one to help them cool off. Try and avoid the temptation of grabbing a Bud or Coors, there are a lot tastier ways to cool off! For those in the know (and now you are one also), summertime is the time for refreshing wheat beers (or Weissbiers in German). Fortunately there are numerous examples to be found, many of which flow from taps here in Staten Island. If you are a true American patriot you can go for the wheat products made by American microbrewers like Sam Adams or Pete's. Pete's Summerbrew is a Wheat beer that has lemon flavor, perfect if you don't keep slices of lemon handy for your Weiss beer.

By far the greatest Wheat beers, both in number and quality, are products of Germany, with the vast majority coming from the Bavaria region. One of the most readily available Weiss beer is Franziskaner's Hefe-weiss. Franziskaner is available on tap in many bars on the Island, so you will not have problems finding some. Recently the Staten Island

Advance ran an article on Weiss beers, rating four wheat's (Pete's Wicked Honey Wheat, Franziskaner Club Weiss, Pschorr-Brau Dunkel Weiss and Paulaner Hefe-weizen). All four are fine wheat beers, but surprisingly missing were two of the finest German wheat beers, Schneider-Weisse and Aventinus (Schneider's Dark weiss).

TomKo Rates the Beers:

Blue Moon Raspberry Cream Ale: This is a wonderful beer that has recently become available in NY. When you open a bottle you immediately become aware of the Raspberries. The beer has a nice flavor, (like drinking a raspberry soda) with a soft creamy finish. When they call it "Raspberry Cream Ale" they aren't kidding! This beer proves that more than just piss-water Coors Light comes from Colorado!

Dead Guy Ale: Rogue brewing has put out one of the most interesting bottles in Dead Guy. I'd buy this one just for the bottle! Oh, and the beer is very good!

Ayinger's Brau-weisse: This is a premium Weiss beer, smooth, refreshing, great with or without lemon. The flavor is sweet and fruity, perfect for a hot day in July.

Schneider-Weisse: One of the best wheat beers around! NEVER serve it with lemon, the flavor is too wonderful to mask. Jim Stayoch introduced me to this fantastic beer, and will always be thankful for that!

TomKo on Bars:

Killmeyer's Old Bavarian Inn

If you are a lover of good German beer, served in a beautifully restored Staten Island landmark, Killmeyer's is the place to go. Killmeyer's, located on the corner of Arthur Kill Road and Sharottis Lane, is the latest endeavor from the owners of Adobe Blues. This is a haven for those who love good German beer. If you never had a liter stein of Optimator (or any other excellent German beer) then you'd better head on over and down a few!

The Inn has what is probably the most beautiful bar on Staten Island (if not the entire city). The bar is made from hand carved mahogany that was dyed cherry. It was made in the Bowery in 1890 and assembled on site, with the final touches all added by Russian Jewish immigrants.

Much of the furnishings were purchased from a German restaurant that recently closed down in New Jersey (Jersey's loss is our gain!). The moose head and boar's head help to add to the feeling your are drinking in a real Bavarian bar. The restoration of Killmeyer's is so complete and authentic that one immediately falls in love with the place.

One of the truly unique things about Killmeyer's is the 3 liter mini-keg. If you have never seen one (and unless you've either already visited Killmeyer's or traveled to Munich) it is truly a sight to see. You can get the kegs in any of the non-weisse beers, for a meager \$21. Tap beers run \$3.50 for 1/2 liter and \$7 for full liters. Weiss beer prices vary based on the brand on tap. There are only four taps at Killmeyer's, but they are all good ones. There is a large selection of German bottled beers and American Microbrews to choose from.

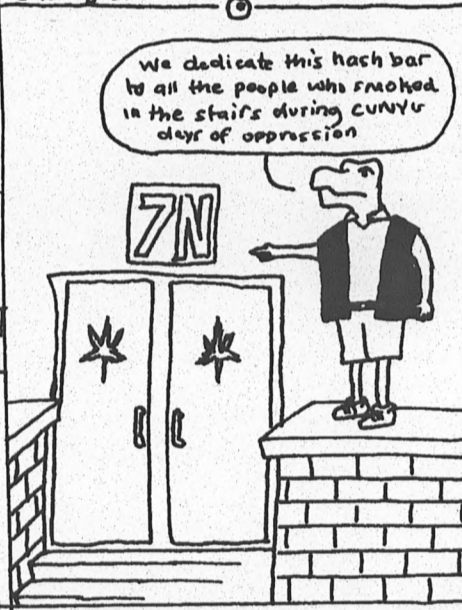

Currently only the bar is open. There will be a full menu German restaurant within the next month or so. This joint gets really packed now, and I fully suspect that Killmeyer's will draw even larger crowds once the kitchen is open. If I were you I'd head over to Killmeyer's ASAP! Oh, and tell them TomKo sent ya!

Drog™ 2001: A CUNY ODYSSEY

2001: Drog gets on the loop bus at the new lot 17. It takes approx. a year to get to 155.

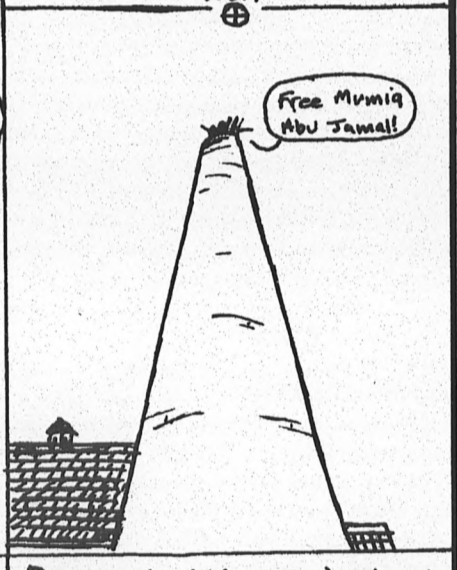

2002: Drog wins the position of Student Government President by a landslide voting of 12-1. He makes some changes.

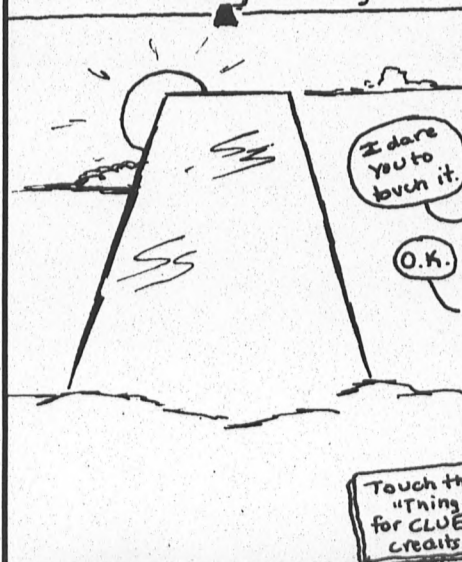

2004: CUNY is run by the new Eureka 9000 system. The most enhanced student-CUNY interface. It is perfect in every way.

2005: The editors of the college voice finally snap and start picking off people from the 1M Tower.

2006: While digging out the foundation for 18N, the workers find something strange.

2009: After almost all the CSI students have been dared to touch it, CUNY notices that an enhanced breed of student is attending the school.

2010: While driving his standard issue "Eureka" car, Senator Joe Canale attempts to pass the loop bus while it's stopped.

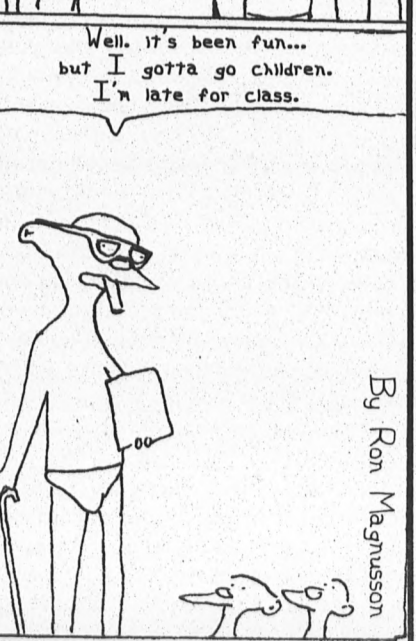

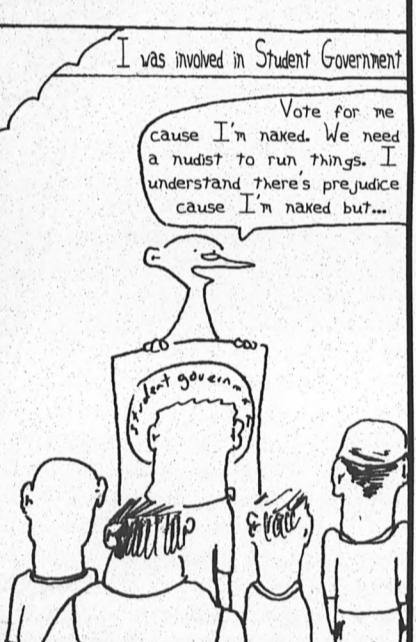

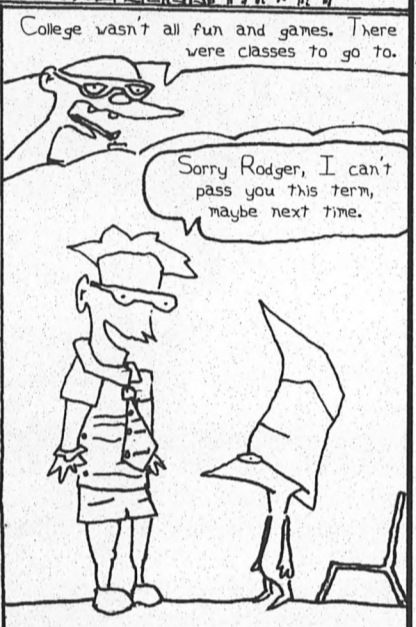

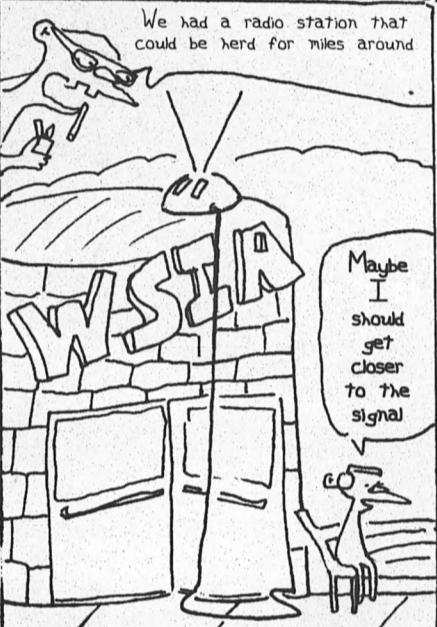

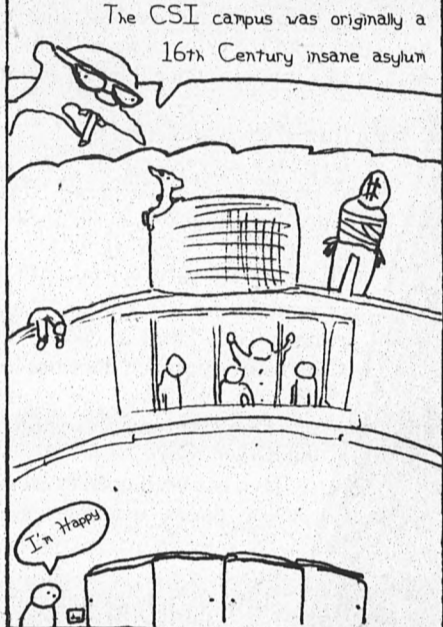

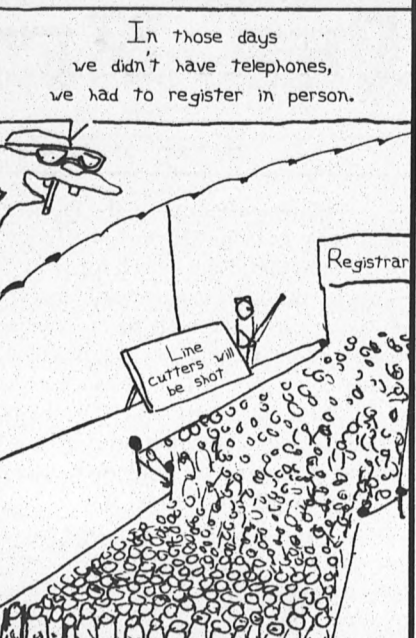

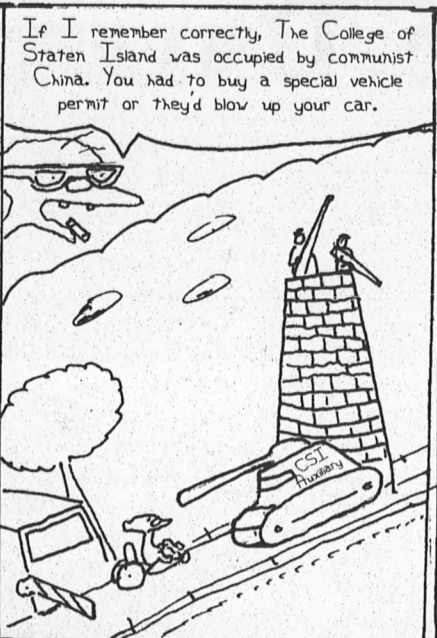

Drog gets hit and is dead on impact. He goes a good 20 ft. before he finally lands.

THE NET UNLEASHED: MULTIMEDIA ON THE WEB

By Ralph Mastrangelo

In the early days of the World Wide Web (WWW) interactivity was limited to E-mail and maybe some CGI form scripts, that did a search for you. Now after years of evolution there are many ways for you to interact with web pages, or make web pages look and feel real. All these features would not be possible without a good browser. Netscape (P.C. and Macintosh versions) support most of these advances, and with the help of plug-ins for the ones it does not. Internet Explorer by Microsoft has a set of features all of its own, that are not supported by Netscape

without a plug-in. The new version can use most Netscape plug-ins to increase its diversity. This war between the two big browsers should not get in the way of your surfing. If you have the space use both, so you can enjoy the Net to its full extent. One point of interest, version 3.0 of Internet Explorer will have all the capabilities of Netscape 2.0 (except Frames), the vice versa cannot be said for version 3.0 of Netscape.

Real Audio:
<http://www.realaudio.com/>

Can best be described as a live real-time stream of music, news, talk, etc.. broadcasted over the Net. There are many uses for this but the predominant use is Net radio. There are many sites dedicated to playing music (classic to alternative), talk radio, news and weather. This site acts just like if you were listening to your car radio. You do not have to download a huge file or weight for a new song to start. It's as simple as 1,2,3.

First download the Real Audio player from the address above. Second install the program. Third logon to any Real audio sight. This can be done in two ways, through your web browser, such as Netscape or Internet Explorer which will load the player, when needed, after you go to the WWW site and pick a station. Another way is by using the Real Audio player by itself and linking it to a station address you know, via the players Hot list or typing the address.

There is not only Radio stations on the Net, some people also use Real Audio for general sound files. No more downloading big sound files, first listen and if you like what you hear, then you can go through the trouble of downloading.

One point to know, if you are still using a 14.4 modem, forget that you have read the above passage.

Shockwave:
<http://www.macromedia.com/Tools/Shockwave/>

This handy feature by Macromedia allows for intense graphics, animation, games, etc.. The ability of ShockWave has not reached its full potential. It is part of Macromedia's Director software and can be used for full

presentation on a page. But right now Shockwave is being used to create animated page logos, games and whatever fun idea people come up with. The address above has a link to a game page gallery, where you can load a page and play a video game. Most of these games look like the handheld games or classic games, but are fun to play. For anyone who is into classic games like Frogger,

above passage.

Gif Animation: (<http://member.aol.com/royale/gifanim.htm>)

This feature is supported by Netscape only, and is an easy way to make animated icons, logos, bars, words, or whatever you wish. These programs, which allow you to create these images, is easier to use than Macromedia's Director (and is about \$800+ cheaper). You can get a shareware version of these programs from the Address above. After setting them up, create the image you want to animate frame by frame. Then use the program to make them work the way you want it to. The program that I recommend is Gif Construction Set for Windows 3.x / 95 or Gif Builder for the Macintosh.

The images you create are client side, which means that images load like normal images then do their animation thing. The animated images cause Netscape to appear to be always loading, due to the images restarting from the original frame. This feature works with a 14.4 modem, since they are client side.

Java: (<http://www.sun.com/>)

A language developed by Sun Microsystems, based on the C/C++ language. This is an Object Oriented language, which allows web pages to do many things. Java is only supported by Netscape 2.0 or by Sun's Hot Java browser (Not yet available for P.C. or Mac). Java works hand in hand with Html to create Web pages. Its Client side approach does not increase download time. Netscape compiles the Java and runs the program when the page is done loading.

Java has been used to create many interactive pages, examples are Calculators, GPA Calculators, scrolling text, animation, etc...

(<http://www.gamelan.com/noframe/Gamelan.html>) I have seen sites where Java is used to make traveling the sight easier and telling you how long you have been at that site. With forms, Java has been used to auto update the sections that have identical inputs, etc. etc.

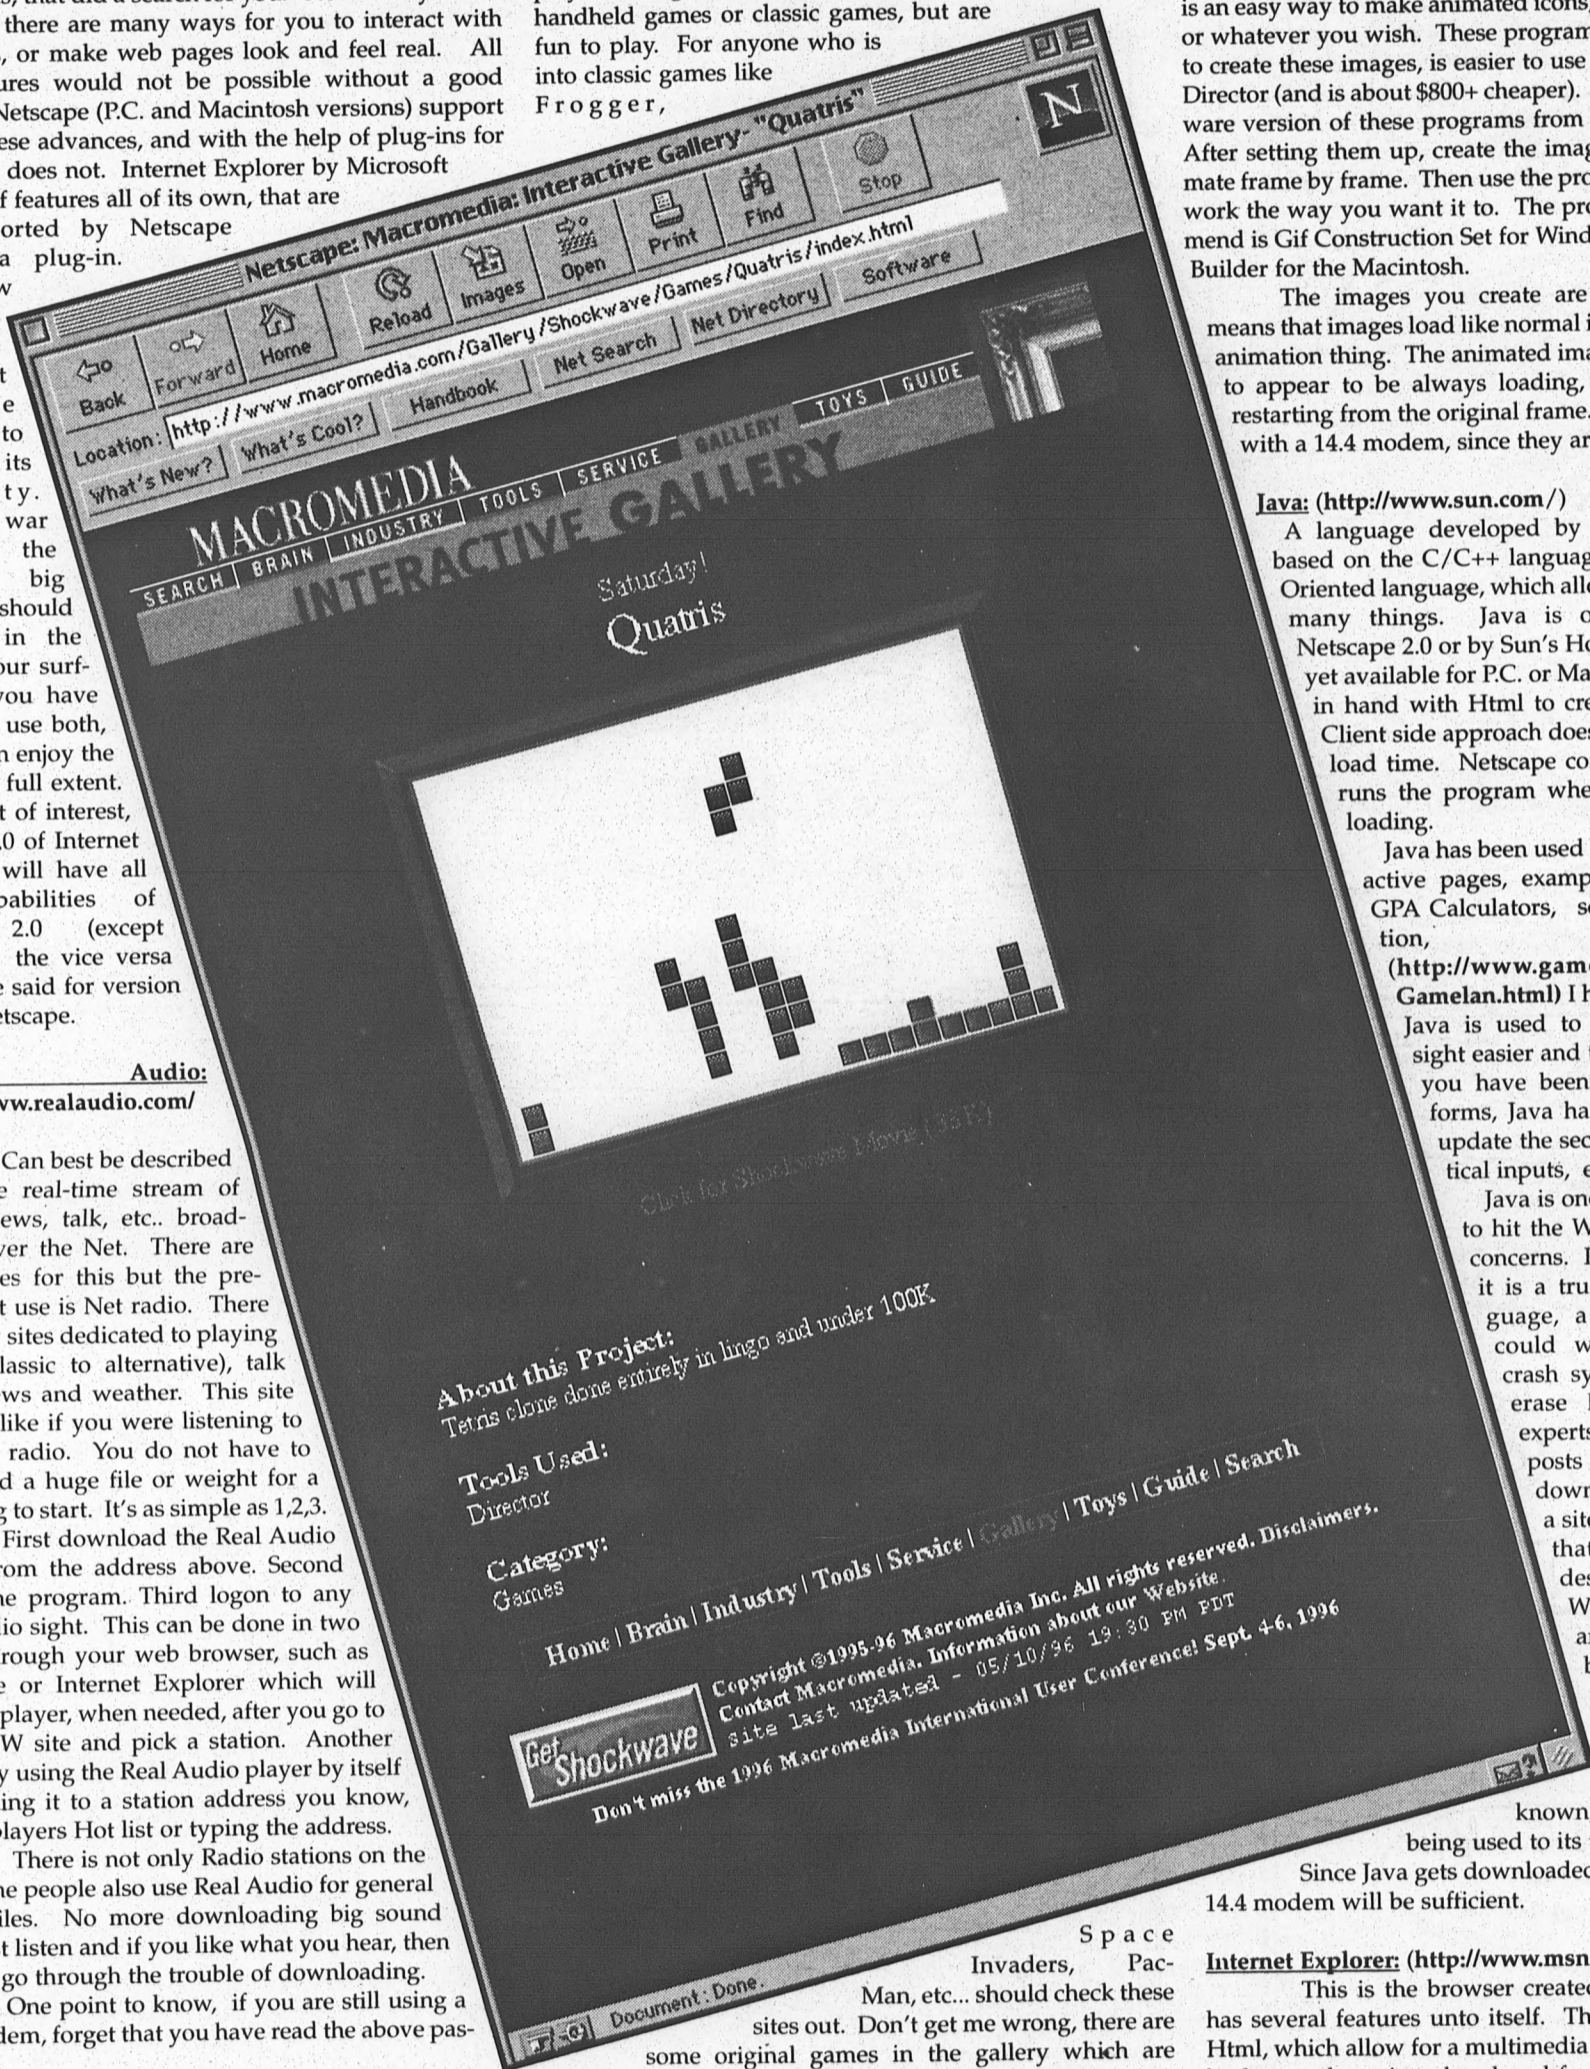

Java is one of the newest ideas to hit the Web, and has brought concerns. People fear that since it is a true programming language, a good programmer could write a program to crash systems, steal data or erase hard drives. The experts at Sun say, that Java posts as much a threat as downloading a game from a site does. They also say that Java is being designed to make the Web more interactive and is not designed to be a threat. There are many possibilities for the uses of Java and as it grows its true capabilities will be

known, because Java is not being used to its true potential.

Since Java gets downloaded like text and Html, a 14.4 modem will be sufficient.

Internet Explorer: (<http://www.msn.com>)

This is the browser created by Microsoft and it has several features unto itself. These features are basic Html, which allow for a multimedia experience. IE allows background music to be played from the page adding to the theme. Inline images can now be replaced or complemented with inline movies. These inline movies can also be set to look like pictures, until a mouseover causing the movie to be started. A marquee (scrolling text) can be created easily, you don't have to write a special Java code or create an animated image.

To see the full features of a Shocked Page, you have to download a plug-in for Netscape (<http://w3.ag.uiuc.edu/AIM/2.0/index.html>) (Does not work with Internet Explorer) and install it. That's it, there are no other programs to use. One point to know, if you are still using a 14.4 modem, forget that you have read the

Space Invaders, Pac-Man, etc... should check these

sites out. Don't get me wrong, there are some original games in the gallery which are somewhat good.

Rangers Sent Packing By Penguins

By Michael Anderson

In the NHL, the Rangers found out that older doesn't mean better. The New York Rangers were eliminated from the playoffs by the Pittsburgh Penguins live on Saturday night. The Rangers were down in the first round to the Montreal Canadiens 2-0 won the won that series 4-2. However, against Pittsburgh there would be no such luck.

Possibly the biggest reason for the loss may be due to the Rangers inability to perform at home during the series. After losing the first game in Pittsburgh 4-3, the Rangers stepped it up for game two. Still in Pittsburgh, the Rangers knew how crucial it was to head back to New York tied. Captain Mark Messier showed his troops how its done. In the first minute, he checked a Penguin so hard people cringed. That set the tempo and mood for the Rangers as they won game two 6-3. Now the Rangers had the home ice advantage for the rest of the series. However, first they had to utilize it.

In game three, the Penguins traveled to the Garden not about to be intimidated. They took the Garden ground and silenced them by winning this game 3-2. Whatever momentum and home ice advantage the Rangers had was now gone. For game four it was crucial for the Rangers to win. If they lost, they would head back to Pittsburgh down 3-1. Furthermore, they would have to beat Pittsburgh three straight games with two of them being played in the Igloo.

Game four just didn't turn out the way the Rangers had hoped. With the home ice turned on, the Rangers couldn't take control. The break of the game came late in the third period. With the Rangers deep in their own zone Jeff Beukeboom tried to make a somewhat risky pass. He tried to slip a pass past a Penguin player. However, it was a bad pass as the Penguin stole the puck right in front of the Ranger goal. He held onto the puck and blasted a slapper over the left shoulder of goalie Mike Richter. With the goal, the Penguins took the lead 3-1 and eventually tallied another as they beat the Rangers 4-1. The pass all but assured the Rangers' season to end soon. I don't know if the pass will live in Beukeboom's mind forever, but it will eat at him all offseason.

Heading back to the Igloo for game five, the Penguins now had everything on their side. They had the confidence. They had the momentum. And they had the two top players in the playoffs ready to explode. Many people have called the duo of Jaromir Jagr and Mario Lemieux the two best in the league. During the season, when one would struggle, the other would pick it up. Unfortunately, for the Rangers, both players decided to pick it up for this game. Jagr and Lemieux decided that they were short in the hat department. To compensate, they both went out and tallied hat tricks. With the duo scoring six, it was no wonder that the Rangers lost 7-3. With the hat tricks, not only did Pittsburgh move to the third round, but they ended the Rangers season. It's a given that if Jagr and Lemieux play like this for the

remainder of the playoffs they will be the champs. With that being said, player changes must be made.

After every season, and especially in New York, players and management has to be addressed. Which players should stay and which should go? Well, I'm no Neil Smith, but one thing that is pretty imminent is that the Rangers are very old and slow. Before and during the season they made two big trades. In both cases, they traded away possible up and coming young players for older and more experienced veterans. The Rangers looked at them as experienced, but as the season progressed it was apparent they were just plain old.

Watching the Penguins series, it seemed as though the Penguins were wearing turbo skates and the Rangers were not. But they weren't. It just seemed that way because the Rangers were older and slower. No matter what offseason changes the Rangers make, they must add some youth combined with speed. If it doesn't come in superstar fashion, then a combination of any young speed will do. With their most recent trade the Rangers dumped their young and went for hard-checking veterans. They acquired Marty McSorley, Shane Churla, and Jarri Kurri from the Los Angeles Kings. They may be hard-checking, but in order to check, you have to catch the opponent first. The Rangers should remember this when it comes time to address their offseason needs. Speed and youth may not be everything, but it sure does help.

Baseball With a New York Flavor

By Michael Anderson

Funny how things work. This year the Mets were supposed to be wild card material. The Yankees were supposed to be pretty good, but the Baltimore Orioles were going to run away with the American League East. Well a quick look at the standings show something different. After both teams finished a weekend series with Chicago, a couple of surprises persist. Although the Yankees won only one of three from the White Sox, they still hold a 2 1/2 game lead over the Orioles. Meanwhile, in Flushing, the Mets are 9 1/2 games out of first, but more importantly they are the second worst team in the National League. Where did these teams go right? Where did these teams go wrong? The reasons may be caused by injuries and some may be caused by lousy performances.

Yanks put Cone on the shelf for '96. Possibly the biggest blow to all of New York may be the early departure of David Cone. After Cone had numbness in one finger he pitched anyway at the Stadium against the White Sox. He pitched a masterful game, giving up just one run in a Yankee victory. However, the happiness of the victory soon turned to huge concern. The numbness of fingers spread to one finger to three fingers. After plenty of tests, Cone was found to have an aneurism in his pitching arm. There was no hesitation in what should be done. Cone should have the surgery and have the season to heal. This blow will be costly to the Yankees. At the time, Cone led American League starters with the lowest ERA. Furthermore, besides the innings and confidence lost the Yankees have another problem. They are now forced to put the "ace of the staff" tag on second-year lefty Andy Pettite.

Mets lose their Pulse. The blow to the Mets staff came right before the season had started. It was announced that promising second-year pitcher Bill Pulsipher will be out for the year. The lefty had torn ligaments in his pitching elbow and season-ending surgery had to be done to correct the problem. This blow proved to be too costly for the Mets. The injury took the only lefty starter out of the Mets rotation. Not only was the left arm important to the Mets, but so was his cockiness. Potential future All-Star pitchers, Jason Istringhausen and Paul Wilson, are also struggling this year. Their confidence just isn't there. Could the departure of Pulsipher contribute to this?

Help Wanted: A Good Second Baseman. At one point some critics said the Yankees didn't have a great sec-

ond base. Pat Kelly was coming off surgery and wasn't progressing as well as the Yankees had hoped. Tony Fernandez was a great shortstop in his prime, but he's older now and it was decided he was going to play second. Well, these little problems blew up. Kelly and Fernandez soon went on the DL for the season. That enabled the Yankees to turn to journeyman Mariano Duncan. This turned out to be a blessing in disguise. Duncan went into the zone and soon led the American League in hitting. His zone turned to disaster when he went down with a strained left groin. The injuries leave the Yankees with a platoon of two rookies, Andy Fox and Robert Eenhoorn, at second base. Trouble may end after the All-Star break when Pat Kelly is expected back.

The hitters
took this
challenge and
chewed it up.

Who's in Right? The Mets have a bunch of outfield prospects in the minors. But right now, the Mets are trying one of them now. After lighting up spring training, Butch Huskey was given the starting right field position. His struggle has made brass wonder if this was the right move. At the plate, he has only hit two homers. That's not so bad, except he is also the Mets clean-up hitter. He has not delivered at the plate. In one game, Husky played first for an ailing Rico Brogna, and he cost them the game. Besides his lousy hitting, he made at least three defensive blunders that enabled runners to score. When the Mets gave him a day off, they tried Carl Everett in right. All the tools are there. The arm, the speed and the hitting. But his hitting is very streaky. He'll pound the ball one week and look horrid the next. AAA rightfielder Alex Ochoa is waiting in the wings. He's hitting over .350 and like Everett he owns all the tools. He should be in right by next week and stay there until he proves otherwise.

Is Gooden plenty? At the beginning of the sea-

son, the Yankees decided to put ex-Met and drug user Dwight "Doc" Gooden in their starting rotation. Although he didn't play at all last season, the Yankees didn't seem to care. If it would attract fans, then do it. The year off definitely showed as he got rocked in the early-going. Gooden then tried working at his mechanics to correct his problems. He tried using a shorter delivery to correct his problems. So far it has worked as his pitching has improved and this past week he received his first American League victory. The only problem may be that he hasn't faced tough competition. The White Sox and Twins aren't exactly foes people are scared of.

Not only can they field, but they can hit too. Rookie shortstop Rey Ordonez and second baseman Jose Vizcaino are known around the league as premier defensive players. Ordonez showed people this on the first game of the season. On a double, St. Louis Cardinal Royce Clayton tried to score from first. On a bad throw from left, Ordonez caught the ball on his knees. He then threw from his knees and nailed Clayton from the outfield. People were amazed. But can he hit? This was a big problem the Mets faced. They weren't too sure themselves. Ordonez showed that he can hit after all. He's not a power hitter, but his slap singles get him on base and boosts his average. He is currently hitting over .300. The average may not stay there, but it may also improve as he adjusts to major league pitching. Jose Vizcaino was moved from short to second with the arrival of Ordonez. Last year, he was the one constant in the Mets lineup. This year, he's the same. His average is over .330 with a slugging percentage over .450. The Mets knew he could hit, but doing this well was a pleasant surprise.

Hitting Can Cure Problems. Since the Yankees don't have great pitching, it's up to the hitting to help out. The hitters took this challenge and chewed it up. They have pounded the opposition. After a weekend series with the White Sox, the Yankees team batting average was over .300. However, the highlight may have come when they trailed the White Sox 8-0 in the first inning. After a strong pitching performance from the bullpen, the bats woke up. Keyed by Joe Girardi's bases clearing triple, the Yankees eventually won this game 9-8. This game showed many teams around the league that no lead is safe with the Yankees. Paul O'Neill is hitting well over .350 and Wade Boggs is over .320. However, the surprise may be that Gerald Williams is hitting around .340. If the pitching gets better and the hitting remains constant, the Yankees can challenge the Indians.

BULLS AND SONICS SHOULD MEET IN FINALS

By Tom Krasniqi

The run for the NBA title is heating up and the two time defending champion Houston Rockets will not be in the finals this year. Neither will the New York Knicks. The Rockets were swept off the court in four games by the up and coming Seattle SuperSonics. The Knicks battled the Bulls hard and had the Bulls on the ropes in a couple of those games but were not able to finish the job. The Knicks deserve credit for making it an interesting series but they let the Bulls off easy.

The time has finally come to see who has what it takes to go all the way. I predicted back in October that it would be Chicago vs. Seattle. I will stick to that pick and it will play itself out. The Orlando Magic have breezed through the post season so far and are poised to get back to the Finals. Out West, the Utah Jazz hope to finally get King Kong off their back. Let's take a closer look at the both of the conferences and see what's the story:

Eastern Conference: The Chicago Bulls have been very fortunate to this point. The Knicks gave them all they could handle and it bought out some flaws on this team that many thought were flawless. First off, no matter what people say, Michael Jordan is still the *entire* team. Without Jordan, this Bulls team would be a sixth or seventh seed in the Eastern Conference. The man beat the Knicks all by himself. Scottie Pippen has apparently reverted back to his old form of not showing up in big games and backing down against teams that play him physically i.e. the Knicks. He was erratic during the Knicks series and must turn it up a notch against Orlando or Chicago will lose. He looks an awful lot like Gonzo with that nose of his. Dennis Rodman has rebounded the basketball and played defense that the Bulls wanted from him. Toni Kukoc may not be healthy enough to be effective versus Orlando. Chicago really missed him during the last couple of games during the Knicks series. He can provide instant offense for this team when Jordan and/or Pippen hit a down spot during a game. Ron Harper and Luc Longley have played well during the playoffs but must remain consistent. Head coach Phil Jackson has done a masterful job guiding this team full of egomaniacs to an incredible record in the regular season and for his strategies as far as playing mental games with other people's emotions. If he should win another NBA title this year, he may jump ship to, are you ready for this, the New York Knicks and become their next head coach. His contract is up after this season and Jackson, a former Knick player during their glorious championship years, has openly campaigned for the job. That's something that bears watching over the summer.

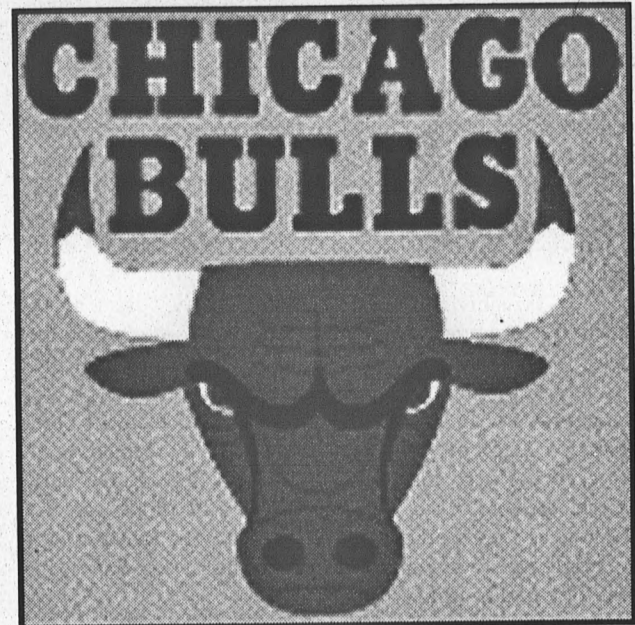

The Orlando Magic have cruised through the first two rounds of the playoffs by blasting Detroit and Atlanta. Shaquille O'Neal has had a great post season and will be the key to beating the Bulls. Chicago had a tough time containing Patrick Ewing, who almost killed them. Shaq will kill Longley down low. Chicago will have to double down on him and Shaq has become much improved as a passer. He will find Dennis Scott, Nick Anderson and Anfernee Hardaway on the perimeter for wind open jumpers. If they hit the majority of them, they will win. I think the Bulls have better depth than Orlando with the

likes of Kukoc (if healthy), Steve Kerr, Bill Wennington, John Salley and others. The Bulls will foul Shaq hard inside and will force him and the Magic to beat them from the foul line, where Orlando is one of the worst free throw shooting teams in the NBA. The Bulls have the edge coaching wise with Jackson over Brian Hill. In the end, it will be Michael Jordan who carries the Bulls past Orlando. When they met last year in the playoffs, MJ committed un-Jordan like mistakes down the stretch. It won't happen again this year. Jordan will be committed to torching Nick Anderson and friends and that will be enough for the Bulls to win. It should be a very exciting series but in the end, Jordan Rules! Prediction: Bulls in six.

Western Conference: What a difference a year makes. Last year, Seattle was in complete disarray after losing in the first round of the playoffs for the second straight year. As it turns out, that experience has helped this team become more hungry and determined to get to the next level. The Sonics got by Sacramento in round one and did what many thought was impossible. They swept the two-time defending champion Houston Rockets in four straight games. The NBA has seen the emergence of two Sonic players who have become great players in this league: Gary Payton and Shawn Kemp. Payton has stepped up his game big time and will reap the benefits that comes from becoming a great player. He has already won Defensive Player of the Year award and is an NBA All Defensive first teamer. This guy is a great defensive play-

The match-up that I'm dying to watch will be Michael Jordan against Gary Payton. Payton's defensive prowess will be put to the test against the greatest player ever.

er. He has improved his offensive game as well, and the Rockets found that out. He's a consistent jump shooter and is lightning quick off the dribble, taking anybody to the hole strong. He can create his own shot. He's dangerous at both ends. Payton will become a free agent at season's end. Are you listening, Knicks? He would be a perfect fit with the Knicks in the way that the Knicks play rugged, in your face defense. That's Gary Payton's style of play but Payton has expressed a desire to stay on the left coast so New York doesn't seem to be in his future. Payton's assist total also has increased year after year. It certainly helps when you're playing with a 6'10" high flyin' dunking machine by the name of Shawn Kemp. Kemp never played college basketball, so he basically made the jump from high school to the NBA. And what a jump this guy has made. He, like Payton, has improved each year at both ends of the court. Kemp is an exciting offensive player who can dominate the paint with an array of low post moves that are executed with amazing grace and with a lot of quickness and speed. He was matched up with Hakeem Olajuwon and did a great job on him scoring at will and blocking shots at the defensive end. Kemp's long arms and his awesome athletic ability make him a ferocious rebounder. Once he gets a consistent jump shot, look out. He came up big in big games scoring 32 points and grabbing 15 boards in Seattle's game clinching win at Houston. There are plenty of members in Seattle's supporting cast with the likes of Detlef Schrempf, Hersey Hawkins, Nate McMillan, Earvin Johnson and Sam Perkins. Coach George Karl has done a good job getting his team prepared and should be given credit.

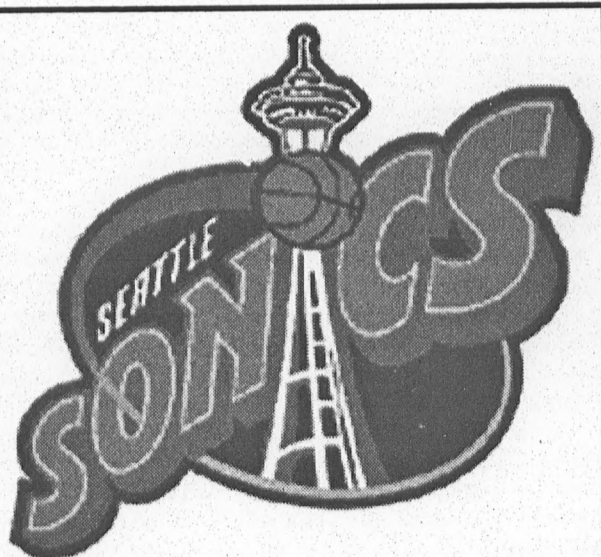

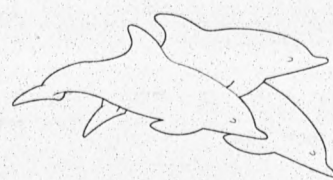

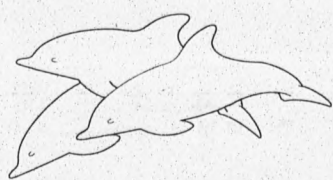

Seattle will tangle with Utah in the Western Conference Finals. The Jazz, led by John Stockton and Karl Malone, beat Portland and San Antonio to get this point. And it was all Stockton and Malone. They have suffered playoff disappointments before and they don't want it to happen again. That's too bad because it will happen again. Seattle will beat Utah because I think Seattle's more determined to get it done. This sets up a great match-up(s) with Seattle's Gary Payton and Shawn Kemp against Utah's John Stockton and Karl Malone. The torch will be passed during this series. Payton-Kemp will be the next Stockton-Malone. The Sonics have a better supporting cast and will have home court. That will be more than enough to dispose of Utah. Prediction: Seattle in six.

NBA FINALS: Seattle vs. Chicago. Should be an interesting series. The match-up that I'm dying to watch will be Michael Jordan against Gary Payton. Payton's defensive prowess will be put to the test against the greatest player ever. Pippen will have a good series and Rodman will be on Kemp the entire series. In the end, Jordan once again rules and will be MVP once again. It will be very entertaining to watch but the Bulls will rise above the rest. Prediction: Bulls in 6.

QUICKOUTS:

Patrick Ewing deserves a lot of credit for bouncing back in the series against Chicago and showing everyone that he is a great player. He will not win a championship in New York. The Knicks should do him and themselves a favor by trading Ewing to a contender so he can continue his quest for a ring. And the Knicks can accelerate their rebuilding process by doing that. Ewing has nothing to be ashamed of. He just plays with a bunch of bums.....Speaking of bums, I've had enough of John Starks. This guy must go now. He killed the Knicks in Games 1 and 4. He turns the ball over way too many times and his streaky shooting is enough to drive a sober man to drink. It's that bad. The Knicks could use a Steve Smith at shooting guard instead of this guy. He should go back to bagging groceries. Now remember John, you shouldn't put eggs in the same bag as bread.....The Rangers are out and so should be the same with Colin Campbell. He had the talent but he still lost. Rangers have some house cleaning to do.....Lennox Lewis got lucky getting that decision over Ray Mercer. He lost that fight hands down. And now he wants to fight Mike Tyson? Please! Tyson will clobber this guy so hard, his dread locks would come off.....My "Thug of the Month" award goes to Chicago Bulls assistant coach Jin Clemons. This punk baited Patrick Ewing into a near altercation during game 2. He's lucky that Ewing didn't get his hands on him. That was totally unprofessional behavior by a punk who will never be a head coach. Oh, I take that back. He could coach a basketball team. Does Riker's Island have a team? (Tom Krasniqi hosts "Sports Action" every Sunday night from 9pm to 11pm on 88.9FM WSIA Staten Island)

Men's Baseball

May 10 vs John Jay at Yankee Stadium for CUNY Final This year in basketball, CSI won the CUNY championship. Now it was time to see if they could claim the CUNY baseball championship against John Jay in the House that Ruth built. Things did not start too smoothly for the Dolphins. After scoring a run in the top of the first, CSI fell behind in the inning 2-1. After four complete, the Dolphins trailed 5-1. This was not a good spot to be in for the championship. However, as the later innings arrived so did CSI's rally.

In the seventh inning, Tom D'Angelo hit a two-out, two-run double. The rally ended soon after the hit when

game few similarities as the CUNY championship. Although the game was played in Willowbrook, John Jay was still the home team because of a higher seeding. CSI struck in the first with two runs, only to be outdone by John Jay's three runs in the bottom of the frame. The third similarity was that CSI fell into a big deficit.

After four complete CSI was down 9-4. However, it took the seventh inning to get them started. In that inning CSI scored two to knock the deficit to 9-6. CSI took over the lead with five runs in the eighth. The rally was capped off with Joe Coniglio's two-run single. Insurance game in the ninth when the Dolphins scored four more runs on sloppy play. After Eric Klayman and Jason Anarumo walked two errors were made on John Testa's bunt to the mound. Klayman and Anarumo scored on the errors. Tom Considine then followed with a RBI double. In fact,

Notable Performances Tom Considine finished 3 for 5 with 2 runs and 2 RBI. Steve Galli and Jason Anarumo each finished with 2 RBI each. Pete Noto pitched the last 1 2/3 innings to earn the save.

Women's Softball

May 4 vs Hunter College for the CUNY Championship After CSI beat John Jay 28-21 in the semifinals, it was now time to go against the number one seed of the tournament, Hunter. Although CSI was the two seed many did give them a chance against Hunter. Maybe it was because Hunter beat all four CUNY

D'Angelo was caught trying to stretch his double to a triple. Now down 53, CSI tried their last gasp of hope in the ninth. Tom Considine led-off the ninth with a double. After the double John Jay brought in a new pitcher. It worked almost perfectly as he got the next two outs. With CSI down to its last out, Steve Galli pushed the run home with a single to right. After the next batter walked, CSI now had first and second with two out. This is where the hopes ended. The next batter popped to short and with it went CSI's hopes of a CUNY championship.

Notable Performances Dan Price pitched great in a relief role. He pitched 3 2/3 innings allowing four hits. Pete Noto also pitched a perfect eighth inning. D'Angelo finished 1 for 3 with one run scored and 2 RBI.

May 11 vs John Jay in the ECAC Metro NY/NJ Tournament. This time the game was for something different. It was for pride. And CSI showed a lot of it as their late inning rallies proved to be too much for John Jay. CSI won this semifinal match-up 15-10. Last game, CSI managed only five hits, but this time they banged out 13. This

opponents in the regular season by an average of ten runs. Maybe it was that Hunter won their semifinal 13-1. Or maybe it was because Hunter beat CSI earlier in the season 17-0. Whatever the reasons, CSI didn't seem impressed. They were so unimpressed they got the upset beating Hunter 9-8.

While down 5-4 in the fourth, Lynne Addington put CSI ahead 7-5 on a three-run homer. Hunter eventually tied the score at 7. The turning point came in the top of the seventh. Laura Baez' base hit gave CSI the lead by one. Her run on a double steal proved

to be the clincher.

Notable Performances Lynne Addington was named tournament MVP as she finished the tournament 7 for 9 with 9 runs scored, 5 stolen bases and 5 RBI. Coach Sonny Grasso became the first person in CUNY history to lead both a baseball and softball team to CUNY championships. This year's softball team and the 1982 baseball team.

Men's Tennis

April 18 at Rutgers-Newark CSI traveled to Rutgers-Newark to lose badly 8-1. The only winner from CSI was Greg Tait as he won 0-6, 6-4, 6-2.

April 19 vs Jersey City State What a difference a day makes. After losing on the road, CSI returned home to demolish Jersey City State. Winners included Robert Klein (6-0, 6-0), Ovi Toderic (6-2, 6-3), Jeff Morris (6-4, 6-0), Troy Coleman (6-0, 6-3), John Fucci (6-1, 6-0) and Greg Tait (6-2, 6-3). Double wins included Klein and Sate Schumsinlapa (6-3, 6-4), Morris and Coleman (6-3, 6-4) and Fucci and Tait (6-1, 6-1).

April 20 at the United States Merchant Marine Academy With the score knotted at 4-4, the deciding match fell to the doubles team of Robert Klein and Jeff Morris. They delivered as they won 6-3, 3-6, 6-2. Other winners included Klein in singles (6-4, 4-6, 6-1), Troy Coleman (6-3, 6-3), John Fucci (3-6, 6-4, 6-4) and the doubles team of Greg Tait and Fucci (6-4, 6-0).

April 22 vs Baruch at the National Tennis Center in Queens CSI eked out another close victory edging Baruch 5-4. The doubles team of Troy Coleman and Jeff Morris (8-4) wrapped up the win. Winners included Ovi Toderic (6-1, 6-1), Coleman (6-2, 6-2), John Fucci (6-2, 7-5) and Greg Tait (6-1, 6-1).

April 24 vs York CSI won their fourth straight 6-3. Single winners included Jeff Morris (6-2, 6-2), Troy Coleman (1-6, 6-3, 6-1), John Fucci (6-0, 6-1) and Greg Tait (6-0, 6-0). Double winners included Morris and Coleman (8-6) and Fucci and Tait (6-0, 6-2).

April 25 vs Brooklyn College This one was no contest as CSI killed Brooklyn 9-0. Winners were Robert Klein (6-1, 6-0), Ovi Toderic (6-4, 6-0),

Jeff Morris (6-2, 6-2), Troy Coleman (6-2, 6-1), John Fucci (6-1, 6-0) and Greg Tait (6-1, 6-0). In double Klein and Morris teamed to win 6-2, 6-4, Fucci and Tait teamed for another victory 6-2, 6-1 and Coleman and Sate Chumsinglapa won 6-2, 7-6(9-7).
